

## Encana third quarter results show company is on track to meet full year guidance

Solid liquids growth building momentum for 2013

Calgary, Alberta (October 24, 2012) TSX, NYSE: ECA

Encana Corporation reported cash flow of \$913 million or \$1.24 per share and \$263 million in operating earnings or \$0.36 per share for the third quarter 2012. Year-to-date the company generated cash flow of approximately \$2.7 billion or \$3.71 per share and operating earnings of \$701 million or \$0.95 per share.

Oil and natural gas liquids (NGLs) production volumes in the quarter averaged over 30,000 barrels per day (bbls/d), an increase of nearly 6,000 bbls/d compared to the third quarter of 2011. The Canadian Division volumes were higher primarily due to the extraction of additional liquids volumes at the Musreau plant in Bighorn and a successful drilling program in the Peace River Arch area. The USA Division volumes were higher primarily due to drilling programs across the company's oil and liquids-rich plays.

"The strong quarter-over-quarter growth in our oil and NGLs volumes is the result of a focused effort by our teams to accelerate the development of our oil and liquids-rich plays," says Randy Eresman, Encana President & CEO. "We expect to see this trend continue as we progress our plans to diversify our commodity portfolio and achieve a more balanced stream of future cash flows."

Average natural gas production volumes were 2.9 billion cubic feet per day (Bcf/d), down about 460 million cubic feet per day (MMcf/d) from the same period of 2011 primarily due to voluntary capacity reductions, divestitures and natural declines. In the Canadian Division, declines were partially offset by successful drilling programs in the Bighorn and Cutbank Ridge areas. In the USA Division, declines were partially offset by a successful drilling program in the Piceance Basin.

During the first half of this year, when natural gas prices were at their lowest in the last 10 years, Encana shut-in or curtailed approximately 500 MMcf/d of production. Beginning in August, Encana began bringing the volumes back on-line with the goal that all shut-in and curtailed volumes would be back on-stream prior to winter. With production volumes now largely restored, the company re-affirms its 2012 production guidance of 3.0 Bcf/d.

Encana recorded a \$1.19 billion after-tax impairment charge against net earnings in the third quarter resulting primarily from the impact of the decline in 12-month average trailing natural gas prices. As a result, reported net earnings for the third quarter were a loss of \$1.24 billion. The impairment charge is non-cash in nature, does not affect cash flow or operating earnings and it is not indicative of the fair market value of the company's oil and gas properties or the future net cash flows expected to be generated from the properties.

To date, Encana has increased its natural gas hedge position to approximately 1.2 Bcf/d for 2013 at an average price of \$4.51 per Mcf.

"Our increased risk management position helps to provide additional certainty for our cash flow generation and capital programs for 2013," adds Eresman.

"There are a number of positive signs for Encana as we look towards 2013. In addition to growth in oil and NGLs production and the recent recovery in natural gas prices, we are optimistic as discussions progress on our joint venture and divestiture opportunities," says Eresman. "Looking longer term, with a diversified commodity mix and our proven track record as a low cost producer, we are well positioned to achieve sustainable growth across our portfolio of assets."

#### **Update on Operations**

In the Canadian Division, Encana had a successful quarter with the continued development of its liquids-rich assets.

**Clearwater** – Encana has drilled 13 oil wells through the third quarter in the area with plans in place to drill an additional 20 wells in 2012. Oil and NGLs volumes are up slightly in this area and it is expected these plays will provide a meaningful contribution to liquids growth over the next six months as the new wells are brought on production.

**Duvernay** – Encana has two rigs currently drilling in the area with 12 wells planned for the year. The company has rig released seven wells (two vertical and five horizontal). Condensate yields from these early wells are very promising.

**Peace River Arch** – Encana continues to explore this liquids-rich area with one rig currently working in the region. Encana drilled seven wells in the quarter with a total of 20 drilled to date out of a planned 27 for 2012.

In the USA Division, the company is experiencing encouraging results on its oil and liquids-rich natural gas plays.

**DJ Niobrara** – With plans to drill 18 wells this year, there are currently two wells on production and another nine wells either completed or waiting on completions in this area.

**Eaglebine** – Encana is planning to drill 12 wells in this play in 2012 and is experiencing promising early results from six operated wells on production with some of the wells exceeding expectations. There are two additional wells waiting on completions.

**San Juan** – Encana has drilled four wells through the third quarter, with a fifth in the process of drilling, and a total of eight wells planned for 2012.

**Mississippian Lime** – Encana is currently running a two rig drilling program in the play and is producing from three wells. The company has drilled seven wells to date with a total of 16 planned wells for the year.

**Tuscaloosa Marine Shale** – Progress is being made on delineating the asset. In this area, Encana has four new operated producing wells and two wells waiting on completions, making a total of six wells drilled out of a planned eight in the play for 2012. In addition, the company has four legacy acquired wells. There are two drilling rigs working in the play with the company's focus being on reducing drilling costs.

(All well counts are net wells)

### Quarterly dividend of 20 cents per share declared

Encana's Board of Directors has declared a quarterly dividend of 20 cents per share payable on December 31, 2012 to common shareholders of record as of December 14, 2012.

### **Third Quarter Highlights**

Financial Summary									
(for the period ended September 30)	Q3	Q3							
(\$ millions, except per share amounts)	2012	2011							
Cash flow <sup>1</sup>	913	1,181							
Per share diluted	1.24	1.60							
Operating earnings <sup>1</sup>	263	389							
Per share diluted	0.36	0.53							
Earnings Reconciliation Summary									
Net earnings (loss)	(1,244)	459							
After tax (addition) deduction:	, , ,								
Unrealized hedging gain (loss)	(428)	273							
Impairments	(1,193)	-							
Non-operating foreign exchange gain (loss)	162	(325)

#### **Encana Corporation**

Encana is a leading North American energy producer that is focused on growing its strong portfolio of diverse resource plays producing natural gas, oil and natural gas liquids. By partnering with employees, community organizations and other businesses, Encana contributes to the strength and sustainability of the communities where it operates. Encana common shares trade on the Toronto and New York stock exchanges under the symbol ECA.

### **Important Information**

Encana reports in U.S. dollars unless otherwise noted. Production, sales and reserves estimates are reported on an after-royalties basis, unless otherwise noted. Per share amounts for cash flow and earnings are on a diluted basis. The term liquids is used to represent oil, NGLs and condensate. The term liquids-rich is used to represent natural gas streams with associated liquids volumes. Unless otherwise specified or the context otherwise requires, reference to Encana or to the company includes reference to subsidiaries of and partnership interests held by Encana Corporation and its subsidiaries.

#### **NOTE 1: Non-GAAP measures**

This news release contains references to non-GAAP measures as follows:

- Cash flow is a non-GAAP measure defined as cash from operating activities excluding net change in other assets and liabilities, net change in non-cash working capital and cash tax on sale of assets.
- Operating earnings is a non-GAAP measure defined as net earnings excluding non-recurring or non-cash
  items that management believes reduces the comparability of the company's financial performance
  between periods. These after-tax items may include, but are not limited to, unrealized hedging
  gains/losses, impairments, foreign exchange gains/losses, income taxes related to divestitures and
  adjustments to normalize the effect of income taxes calculated using the estimated annual effective tax
  rate.

These measures have been described and presented in this news release in order to provide shareholders and potential investors with additional information regarding Encana's liquidity and its ability to generate funds to finance its operations.

ADVISORY REGARDING FORWARD-LOOKING STATEMENTS-In the interests of providing Encana Corporation ("Encana" or the "Company") shareholders and potential investors with information regarding Encana, including management's assessment of Encana's and its subsidiaries' future plans and operations, certain statements contained in this news release are forward-looking statements or information within the meaning of applicable securities legislation, collectively referred to herein as "forward-looking statements." Forward-looking statements in this news release include, but are not limited to: expected continued trend of growing oil and NGL production in order to achieve a diversified commodity portfolio and more balanced stream of future cash flows; expectation for curtailed volumes to be brought back into production prior to winter; expectation to meet 2012 Corporate Guidance; expectation that the impairment charge is not indicative of the fair market value of Encana's assets; expectation to make progress on a range of joint venture and divestiture opportunities, including the timing for completion, expected values to be generated, level of interest on the same and the ability to meet 2012 and 2013 divestitures targets; expected benefits from joint venture transactions; planned wells and future development for, including potential upsides from various oil and liquids-rich assets; ability of Company's risk management to support cash flow target for 2012 and cash flow generation and capital programs for 2013; expected 2012 natural gas and liquids production exit rates; achieving optimization and cost reduction across the Company's business; expectation on future natural gas prices, 2013 natural gas production levels, rig count trend, future coal to gas displacement and the price ratio between oil and natural gas; and initial projected 2013 capital, production and cash flows, including the impact on cash flows of increases in natural gas prices.

Readers are cautioned not to place undue reliance on forward-looking statements, as there can be no assurance that the plans, intentions or expectations upon which they are based will occur. By their nature, forward-looking statements involve numerous assumptions, known and unknown risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts, projections and other forward-looking statements will not occur, which may cause the Company's actual performance and financial results in future periods to differ materially from any estimates or projections of future performance or results expressed or implied by such forwardlooking statements. These assumptions, risks and uncertainties include, among other things; volatility of, and assumptions regarding natural gas and liquids prices, including substantial or extended decline of the same and their adverse effect on the Company's operations and financial condition and the value and amount of its reserves; assumptions based upon the Company's current guidance; fluctuations in currency and interest rates; risk that the Company may not conclude divestitures of certain assets or other transactions (including third-party capital investments, farm-outs or partnerships, which Encana may refer to from time to time as "partnerships" or "joint ventures", regardless of the legal form) as a result of various conditions not being met; product supply and demand; market competition; risks inherent in the Company's and its subsidiaries' marketing operations, including credit risks; imprecision of reserves estimates and estimates of recoverable quantities of natural gas and liquids from resource plays and other sources not currently classified as proved, probable or possible reserves or economic contingent resources, including future net revenue estimates; marketing margins; potential disruption or unexpected technical difficulties in developing new facilities; unexpected cost increases or technical difficulties in constructing or modifying processing facilities; risks associated with technology; the Company's ability to acquire or find additional reserves; hedging activities resulting in realized and unrealized losses; business interruption and casualty losses; risk of the Company not operating all of its properties and assets: counterparty risk: risk of downgrade in credit rating and its adverse effects; liability for indemnification obligations to third parties; variability of dividends to be paid; its ability to generate sufficient cash flow from operations to meet its current and future obligations; its ability

to access external sources of debt and equity capital; the timing and the costs of well and pipeline construction; the Company's ability to secure adequate product transportation; changes in royalty, tax, environmental, greenhouse gas, carbon, accounting and other laws or regulations or the interpretations of such laws or regulations; political and economic conditions in the countries in which the Company operates; terrorist threats; risks associated with existing and potential future lawsuits and regulatory actions made against the Company; risk arising from price basis differential; risk arising from inability to enter into attractive hedges to protect the Company's capital program; and other risks and uncertainties described from time to time in the reports and filings made with securities regulatory authorities by Encana. Although Encana believes that the expectations represented by such forward-looking statements are reasonable, there can be no assurance that such expectations will prove to be correct. Readers are cautioned that the foregoing list of important factors is not exhaustive. In addition, assumptions relating to such forward-looking statements generally include Encana's current expectations and projections made in light of, and generally consistent with, its historical experience and its perception of historical trends, including the conversion of resources into reserves and production as well as expectations regarding rates of advancement and innovation, generally consistent with and informed by its past experience, all of which are subject to the risk factors identified elsewhere in this news release.

Assumptions with respect to forward-looking information regarding expanding Encana's oil and NGLs production and extraction volumes are based on existing expansion of natural gas processing facilities in areas where Encana operates and the continued expansion and development of oil and NGL production from existing properties within its asset portfolio.

Forward-looking information respecting anticipated 2012 cash flow for Encana is based upon, among other things, achieving average production for 2012 of 3.0 Bcf/d of natural gas and 30,000 bbls/d of liquids, commodity prices for natural gas and liquids based on NYMEX \$3.25 per Mcf and WTI of \$95 per bbl, an estimated U.S./Canadian dollar foreign exchange rate of \$1.00 and a weighted average number of outstanding shares for Encana of approximately 736 million. Forward-looking information respecting anticipated 2013 cash flow for Encana is based upon achieving average production for 2013 of between 2.9 Bcf/d and 3.1 Bcf/d of natural gas and 60,000 bbls/d to 70,000 bbls/d of liquids, commodity prices for natural gas and liquids based on NYMEX \$3.50 per Mcf and WTI of \$90 per bbl, an estimated U.S./Canadian dollar foreign exchange rate of \$1.00 and a weighted average number of outstanding shares for Encana of approximately 736 million.

Furthermore, the forward-looking statements contained in this news release are made as of the date hereof and, except as required by law, Encana undertakes no obligation to update publicly or revise any forward-looking statements, whether as a result of new information, future events or otherwise. The forward-looking statements contained in this news release are expressly qualified by this cautionary statement.

# **Management's Discussion and Analysis**

This Management's Discussion and Analysis ("MD&A") for Encana Corporation ("Encana" or the "Company") should be read with the unaudited interim Condensed Consolidated Financial Statements for the period ended September 30, 2012 ("Interim Condensed Consolidated Financial Statements"), as well as the audited United States ("U.S.") generally accepted accounting principles ("U.S. GAAP") Consolidated Financial Statements and U.S. GAAP MD&A for the year ended December 31, 2011.

The Interim Condensed Consolidated Financial Statements and comparative information have been prepared in accordance with U.S. GAAP and in U.S. dollars, except where another currency has been indicated. Production volumes are presented on an after royalties basis consistent with U.S. oil and gas reporting standards and the disclosure of U.S. oil and gas companies. The term "liquids" is used to represent oil, natural gas liquids ("NGLs") and condensate. The term "liquids-rich" is used to represent natural gas streams with associated liquids volumes. This document is dated October 23, 2012.

Certain measures in this document do not have any standardized meaning as prescribed by U.S. GAAP and, therefore, are considered non-GAAP measures. Non-GAAP measures are commonly used in the oil and gas industry and by Encana to provide shareholders and potential investors with additional information regarding the Company's liquidity and its ability to generate funds to finance its operations. Non-GAAP measures include Cash Flow, Operating Earnings, Debt to Debt Adjusted Cash Flow, Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization ("Adjusted EBITDA"), Debt to Adjusted EBITDA and Debt to Adjusted Capitalization. Further information can be found in the Non-GAAP Measures section of this MD&A, including reconciliations of Cash from Operating Activities to Cash Flow and of Net Earnings to Operating Earnings.

Readers should also read the Advisory section located at the end of this document, which provides information on Forward-Looking Statements, Oil and Gas Information and Currency and References to Encana.

### **Encana's Strategic Objectives**

Encana is a leading North American energy producer that is focused on growing its strong portfolio of diverse resource plays producing natural gas, oil and NGLs. Encana is pursuing the key business objectives of maintaining financial strength, optimizing capital investments in the Company's highest return projects and continuing to pay a stable dividend to shareholders as it pursues disciplined, responsible and reliable low-cost production growth.

Encana's extensive portfolio of reserves and economic contingent resources in high-growth resource plays in North America serve as the foundation for the Company's long-term strategy of accelerating the value recognition of its assets. Encana has a history of entering prospective plays early and leveraging technology to unlock resources and build the underlying productive capacity at a low cost.

Encana continually strives to improve operating efficiencies, foster technological innovation and lower its cost structures, while reducing its environmental footprint through resource play optimization. The Company's resource play hub model, which utilizes highly integrated production facilities, is used to develop resources by drilling multiple wells from central pad sites. Repeatable operations lend themselves to ongoing cost reductions through optimization of equipment and processes by applying continuous improvement techniques.

Encana is focused on balancing capital investment to build long-term production growth capacity with near term market uncertainty. Encana entered 2012 focused on aligning capital investment plus anticipated dividends with expected cash flow generation. In June 2012, the Company increased its planned 2012 capital investment to \$3.5 billion based on the positive initial results achieved in a number of its oil and liquids-rich plays. The \$600 million in additional capital investment is being funded by cash and is expected to increase liquids cash flow contribution in 2013, which supports the Company's goal of developing a more diversified production and cash flow portfolio. Proceeds from planned divestitures and joint venture transactions are expected to provide additional financial flexibility.

Given the current natural gas pricing environment, many of the Company's drier natural gas plays are seeing a reduced capital program, while a growing portion of capital investment is being directed towards oil and liquidsrich development and exploration opportunities. Encana continues to focus on attracting third-party investments to advance development of the Company's reserves and resources.

At October 22, 2012, Encana has hedged approximately 1.96 billion cubic feet ("Bcf") per day ("Bcf/d") of expected October to December 2012 natural gas production using NYMEX fixed price contracts at an average price of \$5.79 per thousand cubic feet ("Mcf") and approximately 1.2 Bcf/d of expected 2013 production at an average price of \$4.51 per Mcf. The Company's hedging program helps sustain Cash Flow and netbacks during periods of lower prices.

Encana is working to expand the use of natural gas in North America in power generation, transportation and industrial applications. Accessing new natural gas markets, including the export of liquefied natural gas ("LNG"), is part of this initiative. Encana also has a 30 percent interest in the planned Kitimat LNG export terminal in British Columbia.

Further information on expected 2012 results can be found in Encana's 2012 Corporate Guidance on the Company's website <a href="https://www.encana.com">www.encana.com</a>.

### **Encana's Business**

Encana's reportable segments are determined based on the Company's operations and geographic locations as follows:

- Canadian Division includes the exploration for, development of, and production of natural gas, oil and NGLs and other related activities within the Canadian cost centre. Five key resource plays are located in the Division: (i) Greater Sierra in northeast British Columbia, including Horn River; (ii) Peace River Arch in northwest Alberta; (iii) Cutbank Ridge in northern British Columbia; (iv) Bighorn in west central Alberta; and (v) Coalbed Methane ("CBM") in southern Alberta. The Canadian Division also includes the Deep Panuke natural gas project offshore Nova Scotia.
- **USA Division** includes the exploration for, development of, and production of natural gas, oil and NGLs and other related activities within the U.S. cost centre. Four key resource plays are located in the Division: (i) Jonah in southwest Wyoming; (ii) Piceance in northwest Colorado; (iii) Haynesville in Louisiana; and (iv) Texas.
- Market Optimization is primarily responsible for the sale of the Company's proprietary production. These
  results are included in the Canadian and USA Divisions. Market optimization activities include third-party
  purchases and sales of product that provide operational flexibility for transportation commitments, product
  type, delivery points and customer diversification. These activities are reflected in the Market Optimization
  segment.
- Corporate and Other mainly includes unrealized gains or losses recorded on derivative financial instruments. Once amounts are settled, the realized gains and losses are recorded in the reporting segment to which the derivative instrument relates.

Market Optimization sells substantially all of the Company's upstream production to third-party customers. Transactions between segments are based on market values and are eliminated on consolidation. Financial information is presented on an after eliminations basis within this MD&A.

#### **Results Overview**

### **Highlights**

In the three months ended September 30, 2012, Encana reported:

- Cash Flow of \$913 million and Operating Earnings of \$263 million.
- Net Earnings, a loss of \$1,244 million, including after-tax non-cash ceiling test impairments of \$1,193 million.
- Average natural gas production volumes of 2,905 million cubic feet ("MMcf") per day ("MMcf/d") and average liquids production volumes of 30.3 thousand barrels ("Mbbls") per day ("Mbbls/d").
- Realized financial commodity hedging gains of \$400 million after tax.
- Average natural gas prices, including financial hedges, of \$4.91 per Mcf. Average liquids prices of \$72.17 per barrel ("bbl").
- Dividends paid of \$0.20 per share.

In the nine months ended September 30, 2012, Encana reported:

- Cash Flow of \$2,728 million and Operating Earnings of \$701 million.
- Net Earnings, a loss of \$2,714 million, including after-tax non-cash ceiling test impairments of \$2,888 million.
- Average natural gas production volumes of 2,993 MMcf/d and average liquids production volumes of 29.3 Mbbls/d.
- Realized financial commodity hedging gains of \$1,199 million after tax.
- Average natural gas prices, including financial hedges, of \$4.75 per Mcf. Average liquids prices of \$78.63 per bbl.
- Dividends paid of \$0.60 per share.

Significant developments for the Company during the nine months ended September 30, 2012 included the following:

- Entered into a partnership agreement with Mitsubishi Corporation ("Mitsubishi") to jointly develop certain Cutbank Ridge lands in British Columbia owned by Encana. Under the agreement, Mitsubishi agreed to invest approximately C\$2.9 billion for a 40 percent interest in the partnership. The transaction closed in February 2012 and C\$1.45 billion was received.
- Entered into an agreement with a subsidiary of Toyota Tsusho Corporation ("Toyota Tsusho") under which Toyota Tsusho will invest approximately C\$600 million to acquire a 32.5 percent gross overriding royalty interest in natural gas production from a portion of Encana's CBM resource play. Toyota Tsusho invested approximately C\$100 million in April 2012 and will invest approximately C\$500 million over the next seven years.
- Entered into an upstream joint venture agreement with Exaro Energy III LLC ("Exaro") in March 2012 that will result in Exaro investing approximately \$380 million over the next five years to earn a working interest in certain sections of the Jonah field in Wyoming.
- Closed the sale of two natural gas processing plants in British Columbia and Alberta for proceeds of approximately C\$920 million in February 2012.

(1) A non-GAAP measure, which is defined under the Non-GAAP Measures section of this MD&A.

Three months ended September 30, 2012 versus September 30, 2011

Cash Flow of \$913 million decreased \$268 million primarily due to lower commodity prices and lower natural gas production volumes, partially offset by higher realized financial hedging gains and higher liquids production volumes. In the three months ended September 30, 2012:

- Realized financial hedging gains were \$400 million after tax compared to \$146 million after tax in 2011.
- Average natural gas prices, excluding financial hedges, were \$2.77 per Mcf in 2012 compared to \$4.32 per Mcf in 2011. Average liquids prices were \$72.17 per bbl in 2012 compared to \$82.43 per bbl in 2011.
- Average natural gas production volumes of 2,905 MMcf/d in 2012 decreased 460 MMcf/d from 3,365 MMcf/d in 2011. Average oil and NGL production volumes of 30.3 Mbbls/d in 2012 increased 5.9 Mbbls/d from 24.4 Mbbls/d in 2011.

Operating Earnings of \$263 million decreased \$126 million primarily due to lower commodity prices and lower natural gas production volumes, partially offset by higher realized financial hedging gains, lower depreciation, depletion and amortization ("DD&A") and higher liquids production volumes.

Net Earnings, a loss of \$1,244 million, decreased \$1,703 million primarily due to non-cash ceiling test impairments, unrealized financial hedging gain reversals, lower commodity prices and lower natural gas production volumes. These were partially offset by higher realized financial hedging gains, a foreign exchange gain, lower DD&A and higher liquids production volumes. Combined realized and unrealized after-tax financial hedging was a gain reversal of \$28 million in 2012 (2011 - \$419 million gain).

In the third quarter of 2012, the Company recognized after-tax non-cash ceiling test impairments of \$1,193 million (2011 - nil). The non-cash ceiling test impairments primarily resulted from the decline in the 12-month average trailing natural gas prices. Under full cost accounting, the carrying amount of Encana's natural gas and oil properties within each country cost centre is subject to a ceiling test performed quarterly. Ceiling test impairments are recognized when the capitalized costs exceed the sum of the estimated after-tax future net cash flows from proved reserves as calculated under SEC requirements using the 12-month average trailing prices and discounted at 10 percent. Further declines in the 12-month average trailing natural gas prices could reduce proved reserves volumes and values based on SEC requirements and could result in the recognition of future ceiling test impairments.

The Company believes that the discounted after-tax future net cash flows from proved reserves required to be used in the ceiling test calculation is not indicative of the fair market value of Encana's oil and gas properties or of the future net cash flows expected to be generated from such properties. The discounted after-tax future net cash flows do not include the fair market value of unproved properties and probable or possible natural gas and liquids reserves. As well, there is no consideration given to the effect of future changes in natural gas and liquids prices. Encana manages its business using estimates of reserves and resources based on forecast prices and costs.

Nine months ended September 30, 2012 versus September 30, 2011

Cash Flow of \$2,728 million decreased \$505 million primarily due to lower commodity prices and lower natural gas production volumes, partially offset by higher realized financial hedging gains and higher liquids production volumes. In the nine months ended September 30, 2012:

- Realized financial hedging gains were \$1,199 million after tax compared to \$415 million after tax in 2011.
- Average natural gas prices, excluding financial hedges, were \$2.62 per Mcf in 2012 compared to \$4.33 per Mcf in 2011. Average liquids prices were \$78.63 per bbl in 2012 compared to \$85.33 per bbl in 2011.
- Average natural gas production volumes of 2,993 MMcf/d in 2012 decreased 298 MMcf/d from 3,291 MMcf/d in 2011. Average oil and NGL production volumes of 29.3 Mbbls/d in 2012 increased 5.3 Mbbls/d from 24.0 Mbbls/d in 2011.

Operating Earnings of \$701 million decreased \$258 million primarily due to lower commodity prices and lower natural gas production volumes, partially offset by higher realized financial hedging gains, lower DD&A and higher liquids production volumes.

Net Earnings, a loss of \$2,714 million, decreased \$3,195 million primarily due to higher non-cash ceiling test impairments, unrealized financial hedging gain reversals, lower commodity prices and lower natural gas production volumes. These were partially offset by higher realized financial hedging gains, a foreign exchange gain, lower DD&A, higher liquids production volumes and a deferred tax recovery. Combined realized and unrealized after-tax financial hedging gains were \$269 million in 2012 (2011 - \$618 million).

In the first nine months of 2012, the Company recognized after-tax non-cash ceiling test impairments of \$2,888 million compared to \$582 million in 2011. The non-cash ceiling test impairments primarily resulted from the decline in the 12-month average trailing natural gas prices.

### **Quarterly Prices and Foreign Exchange Rates**

Encana's financial results are influenced by fluctuations in commodity prices, price differentials and the U.S./Canadian dollar exchange rate. In the third quarter and first nine months of 2012, Encana's average realized natural gas price, excluding hedging, reflected lower benchmark prices compared to the same periods of 2011. Hedging activities contributed an additional \$2.14 per Mcf to the average realized natural gas price in the third quarter of 2012 and an additional \$2.13 per Mcf to the price in the first nine months of 2012. Encana's average realized liquids prices in the third quarter and first nine months of 2012 reflected lower NGL prices compared to the same periods of 2011. NGL prices in 2012 generally traded at a lower percentage of WTI compared to 2011.

As a means of managing commodity price volatility and its impact on cash flows, Encana enters into various financial hedge agreements. Unsettled derivative financial contracts are recorded at the date of the financial statements based on the fair value of the contracts. Changes in fair value result from volatility in forward curves of commodity prices and changes in the balance of unsettled contracts between periods. The changes in fair value are recognized in revenue as unrealized hedging gains and losses. Realized hedging gains and losses are recognized in revenue when derivative financial contracts are settled.

At October 22, 2012, Encana has hedged approximately 1.96 Bcf/d of expected October to December 2012 natural gas production using NYMEX fixed price contracts at an average price of \$5.79 per Mcf. In addition, Encana has hedged approximately 1.2 Bcf/d of expected 2013 natural gas production at an average price of \$4.51 per Mcf. The Company's hedging program helps sustain Cash Flow during periods of lower prices. For additional information see the Risk Management - Financial Risks section of this MD&A.

## **Production and Net Capital Investment**

### **Production Volumes (After Royalties)**

	Nine m end Septem	led		2012			20	11		2010
(average daily)	2012	2011	Q3	Q2	Q1	Q4	Q3	Q2	Q1	Q4
Natural Gas (MMcf/d)										
Canadian Division	1,343	1,434	1,299	1,237	1,493	1,515	1,460	1,445	1,395	1,395
USA Division	1,650	1,857	1,606	1,565	1,779	1,944	1,905	1,864	1,801	1,835
	2,993	3,291	2,905	2,802	3,272	3,459	3,365	3,309	3,196	3,230
Total Oil and NGLs (Mbbls/d)										
Canadian Division	18.1	14.7	18.0	16.9	19.2	13.9	15.1	14.8	14.3	11.3
USA Division	11.2	9.3	12.3	11.3	10.1	10.0	9.3	9.5	9.0	9.2
	29.3	24.0	30.3	28.2	29.3	23.9	24.4	24.3	23.3	20.5

In the third quarter of 2012, average natural gas production volumes of 2,905 MMcf/d decreased 460 MMcf/d from the same period of 2011. In the first nine months of 2012, average natural gas production volumes of 2,993 MMcf/d decreased 298 MMcf/d from the same period of 2011. The Canadian Division volumes were lower primarily due to shut-in production and divestitures, partially offset by a successful drilling program at Bighorn and Cutbank Ridge. The USA Division volumes were lower primarily due to divestitures, natural declines and shut-in production, partially offset by a successful drilling program in Piceance.

In the third quarter of 2012, average oil and NGL production volumes of 30.3 Mbbls/d increased 5.9 Mbbls/d from the same period of 2011. In the first nine months of 2012, average oil and NGL production volumes of 29.3 Mbbls/d increased 5.3 Mbbls/d from the same period of 2011. The Canadian Division volumes were higher primarily due to the extraction of additional liquids volumes at the Musreau plant in Bighorn, increased royalty interest volumes and a successful drilling program in Peace River Arch. The USA Division volumes were higher primarily due to successful drilling programs in oil and liquids-rich plays. In September 2012, the Musreau facility resumed operations and the Company renegotiated a U.S. gathering and processing agreement which added total liquids of approximately 8.6 Mbbls/d during the month and 2.9 Mbbls/d during the quarter.

Net divestitures reduced average natural gas production volumes for the first nine months of 2012 by approximately 160 MMcf/d compared to the same period of 2011. Production volumes were lower by approximately 55 MMcf/d in the Canadian Division and approximately 105 MMcf/d in the USA Division.

For 2012, Encana plans to shut-in and curtail natural gas production of approximately 250 MMcf/d in areas subject to higher decline and higher variable costs.

### **Net Capital Investment**

	 Three months ended September 30						ded O
(\$ millions)	2012		2011		2012		2011
Canadian Division	\$ 356	\$	535	\$	1,194	\$	1,632
USA Division	380		617		1,375		1,884
Market Optimization	-		-		7		-
Corporate & Other	43		34		120		86
Capital Investment	779		1,186		2,696		3,602
Acquisitions	33		51		361		468
Divestitures	(2)		(55)		(2,698)		(495)
Net Acquisitions and Divestitures	31		(4)		(2,337)		(27)
Net Capital Investment	\$ 810	\$	1,182	\$	359	\$	3,575

Capital investment during the first nine months of 2012 was \$2,696 million compared to \$3,602 million in the same period of 2011. Capital investment in 2012 focused on completing previously initiated drilling programs, executing drilling programs with joint venture partners and increasing investment in oil and liquids-rich development and exploration opportunities. Development of natural gas and liquids-rich plays continued in Piceance, Haynesville, Bighorn, Cutbank Ridge and Peace River Arch. Investment in prospective oil and liquids-rich plays was focused on the Duvernay, Tuscaloosa Marine Shale, the Eaglebine and the San Juan Basin.

Acquisitions in the first nine months of 2012 were \$131 million in the Canadian Division and \$230 million in the USA Division and primarily included land and property purchases with oil and liquids-rich production potential.

Divestitures in the first nine months of 2012 were \$2,505 million in the Canadian Division and \$191 million in the USA Division. The Canadian Division included C\$1.45 billion received from Mitsubishi, approximately C\$100 million received from Toyota Tsusho and approximately C\$920 million received for the sale of two natural gas processing plants. The USA Division received proceeds of \$114 million from the divestiture of the remaining North Texas natural gas producing assets. Divestitures in the first nine months of 2011 in the USA Division included the sale of its Fort Lupton natural gas processing plant for proceeds of \$296 million. Amounts received from these divestitures have been deducted from the respective Canadian and U.S. full cost pools.

Encana entered into a partnership agreement with Mitsubishi for the development of certain Cutbank Ridge lands in British Columbia. Under the agreement, Encana owns 60 percent and Mitsubishi owns 40 percent of the partnership. Mitsubishi initially invested C\$1.45 billion on closing and will invest approximately C\$1.45 billion, in addition to its 40 percent of the partnership's future capital investment, for a commitment period which is expected to be about five years, thereby reducing Encana's capital funding commitments to 30 percent of the total expected capital investment over that period. The transaction did not include any of Encana's existing Cutbank Ridge production, processing plants, gathering systems and Alberta landholdings at the time of the transaction. The transaction closed on February 24, 2012 and C\$1.45 billion was received.

Encana entered into an agreement with Toyota Tsusho under which Toyota Tsusho invested approximately C\$100 million upon closing the transaction and will invest approximately C\$500 million over the next seven years to acquire a 32.5 percent gross overriding royalty interest in natural gas production from a portion of Encana's CBM resource play. The transaction closed on April 19, 2012.

The Company closed the sale of its natural gas processing plants in British Columbia and Alberta for proceeds of approximately C\$920 million in February 2012. As part of the sale, Encana has entered into an agreement for firm gathering and processing services in the Cutbank Ridge area.

The Company closed the remainder of the sale of its North Texas natural gas producing assets for proceeds of \$114 million in March 2012. In December 2011, the Company closed the majority of the North Texas asset sale for proceeds of \$836 million.

Encana is presently involved in a number of joint venture transactions with counterparties in both Canada and the U.S. These arrangements support the Company's long-term strategy of accelerating the value recognition of its assets. Sharing development costs with third parties enables Encana to advance project development while reducing capital investment, thereby improving project returns.

	2012	2011	2012	2011
Production Volumes - After Royalties	1,299	1,460	18.0	15.1

Operating Cash Flow of \$456 million decreased \$65 million primarily due to lower realized commodity prices and lower natural gas production volumes, partially offset by higher realized financial hedging gains and higher liquids production volumes. In the three months ended September 30, 2012:

- Realized financial hedging gains were \$261 million compared to \$77 million in 2011 on a before-tax basis.
- Lower natural gas and liquids prices decreased revenues by \$190 million.
- Average natural gas production volumes of 1,299 MMcf/d were lower by 161 MMcf/d. This decreased revenues by \$76 million primarily due to shut-in production, partially offset by a successful drilling program at Bighorn and Cutbank Ridge. A portion of 2012 production was shut-in at CBM, Greater Sierra and Cutbank Ridge.
- Average oil and NGL production volumes of 18.0 Mbbls/d were higher by 2.9 Mbbls/d, which increased
  revenues by \$23 million primarily due to the extraction of additional liquids volumes at the Musreau plant in
  Bighorn, a successful drilling program at Peace River Arch and higher royalty interest volumes. The deep
  cut portion of the Musreau facility resumed operations in September 2012 which added liquids of
  approximately 5.4 Mbbls/d during the month and 1.8 Mbbls/d during the quarter.

Nine months ended September 30, 2012 versus September 30, 2011

		Nin	e months ende	ed September 3	30

	Nin	Nine months ended September 30							
	Natura (MM		Oil & N (Mbbls						
	2012	2011	2012	2011					
Production Volumes - After Royalties	1,343	1,434	18.1	14.7					

Operating Cash Flow of \$1,351 million decreased \$136 million primarily due to lower realized commodity prices, lower natural gas production volumes and higher transportation and processing expenses, partially offset by higher realized financial hedging gains and higher liquids production volumes. In the nine months ended September 30, 2012:

- Realized financial hedging gains were \$775 million compared to \$235 million in 2011 on a before-tax basis.
- Lower natural gas and liquids prices decreased revenues by \$603 million.
- Average natural gas production volumes of 1,343 MMcf/d were lower by 91 MMcf/d. This decreased revenues by \$124 million primarily due to shut-in production and divestitures, partially offset by a successful drilling program at Cutbank Ridge and Bighorn. A portion of 2012 production was shut-in at Greater Sierra, Cutbank Ridge and CBM.
- Average oil and NGL production volumes of 18.1 Mbbls/d were higher by 3.4 Mbbls/d. This increased
  revenues by \$79 million primarily due to higher royalty interest volumes, the extraction of additional liquids
  volumes at the Musreau plant in Bighorn and a successful drilling program in Peace River Arch. The
  Musreau facility added approximately 1.3 Mbbls/d of liquids production in 2012.
- Transportation and processing expenses increased \$30 million primarily due to higher volumes processed through third-party facilities mainly resulting from the sale of the two natural gas processing plants.

Comparative figures for the three and nine months ended September 30, 2011 presented in the Operating Cash Flow table above have been updated to present processing costs with transportation expense. Formerly these processing costs were presented in operating expenses. The Company has reclassified \$52 million of operating expense to transportation and processing expense for the three months ended September 30, 2011 and \$182 million for the nine months ended September 30, 2011. For additional information see Note 3 to the Interim Condensed Consolidated Financial Statements.

### **Other Divisional Expenses**

	Three months ended September 30					Nine months ended September 30				
(\$ millions)		2012		2011		2012		2011		
Depreciation, depletion and amortization	\$	176	\$	241	\$	572	\$	728		
Impairments		1,074		-		1,822		776		

In the third quarter and first nine months of 2012, DD&A decreased compared to 2011 due to lower depletion rates and lower production volumes. The lower depletion rates primarily resulted from the ceiling test impairments recognized in the fourth quarter of 2011 and the second quarter of 2012 and the credit to the full cost pool for amounts received from divestitures in the first quarter of 2012.

In the third quarter of 2012, the Division recognized a non-cash ceiling test impairment of \$1,074 million before tax. In the first nine months of 2012, the Division recognized a non-cash ceiling test impairment of \$1,822 million before tax compared to \$776 million before tax recognized in the first nine months of 2011. The impairments resulted primarily from the decline in the 12-month average trailing natural gas prices, which have reduced the Division's proved reserves volumes and values as calculated under SEC requirements. A non-cash ceiling test impairment is recognized when the capitalized costs aggregated at the country cost centre level exceed the sum of the estimated after-tax future net cash flows from proved reserves based on SEC requirements, using the 12-month average trailing prices and unescalated future development and production costs, discounted at 10 percent, plus unproved property costs.

The 12-month average trailing prices used in the ceiling test calculations were based on the benchmark prices below. The benchmark prices were adjusted for basis differentials to determine local reference prices, transportation costs and tariffs, heat content and quality.

	Natural Gas	Liquids	
	AECO (C\$/MMBtu)	Edmonton <sup>(1)</sup> (C\$/bbl)	
12-Month Average Trailing Reserves Pricing (2)			
September 30, 2012	2.41	88.74	
December 31, 2011	3.76	96.53	
September 30, 2011	3.78	92.54	

<sup>(1)</sup> Light Sweet.

<sup>(2)</sup> All prices were held constant in all future years when estimating reserves.

	2012	2011	2012	2011				
Production Volumes - After Royalties	1,606	1,905	12.3	9.3				

Operating Cash Flow of \$538 million decreased \$174 million primarily due to lower realized natural gas prices and lower natural gas production volumes, partially offset by higher realized financial hedging gains and higher liquids production volumes. In the three months ended September 30, 2012:

- Realized financial hedging gains were \$300 million compared to \$137 million in 2011 on a before-tax basis.
- Lower natural gas prices decreased revenues by \$240 million.
- Average natural gas production volumes of 1,606 MMcf/d were lower by 299 MMcf/d. This decreased revenues by \$128 million primarily due to divestitures in Texas, natural declines and shut-in production in Haynesville, partially offset by a successful drilling program in Piceance.
- Average oil and NGL production volumes of 12.3 Mbbls/d were higher by 3.0 Mbbls/d, which increased revenues by \$22 million, primarily due to successful drilling programs in oil and liquids-rich plays. In September 2012, the Division renegotiated a natural gas gathering and processing agreement which added liquids of approximately 3.2 Mbbls/d during the month and 1.1 Mbbls/d during the quarter.

Nine months ended September 30, 2012 versus September 30, 2011

		Nin	e months ende	ed September :	30

	2012	2011	2012	2011
Production Volumes - After Royalties	1,650	1,857	11.2	9.3

Operating Cash Flow of \$1,666 million decreased \$329 million primarily due to lower realized natural gas prices and lower natural gas production volumes, partially offset by higher realized financial hedging gains, lower production and mineral taxes, lower transportation and processing expenses, lower operating expenses and higher liquids production volumes. In the nine months ended September 30, 2012:

- Realized financial hedging gains were \$957 million compared to \$392 million in 2011 on a before-tax basis.
- Lower natural gas prices decreased revenues by \$831 million.
- Average natural gas production volumes of 1,650 MMcf/d were lower by 207 MMcf/d. This decreased revenues by \$255 million primarily due to divestitures in Texas, natural declines and shut-in production in Haynesville, partially offset by a successful drilling program in Piceance.
- Average oil and NGL production volumes of 11.2 Mbbls/d were higher by 1.9 Mbbls/d, which increased revenues by \$46 million, primarily due to successful drilling programs in oil and liquids-rich plays.
- Production and mineral taxes decreased \$80 million primarily due to lower natural gas prices.
- Transportation and processing expenses decreased \$58 million primarily due to lower natural gas production volumes.
- Operating expenses decreased \$45 million primarily due to lower property taxes partially offset by higher long-term compensation costs resulting from an increase in share prices.

### **Other Divisional Expenses**

	Three months ended September 30			Nine months ended September 30				
(\$ millions)		2012		2011		2012		2011
Depreciation, depletion and amortization	\$	247	\$	309	\$	864	\$	911
Impairments		608		-		2,386		-

In the third quarter of 2012, DD&A decreased \$62 million compared to 2011 primarily due to lower production volumes. In the first nine months of 2012, DD&A decreased \$47 million compared to 2011 due to lower production volumes, partially offset by a higher depletion rate. The higher depletion rate primarily resulted from lower proved reserves estimates based on SEC requirements due to a decline in natural gas prices, partially offset by a ceiling test impairment recognized in the second guarter of 2012.

In the third quarter of 2012, the Division recognized a non-cash ceiling test impairment of \$608 million before tax. In the first nine months of 2012, the Division recognized a non-cash ceiling test impairment of \$2,386 million before tax. The impairments resulted primarily from the decline in the 12-month average trailing natural gas prices, which have reduced the Division's proved reserves volumes and values as calculated under SEC requirements.

The 12-month average trailing prices used in the ceiling test calculations were based on the benchmark prices below. The benchmark prices were adjusted for basis differentials to determine local reference prices, transportation costs and tariffs, heat content and quality.

	Natural Gas	Liquids
	Henry Hub	WTI
	(\$/MMBtu)	(\$/bbl)
12-Month Average Trailing Reserves Pricing (1)		
September 30, 2012	2.82	94.97
December 31, 2011	4.12	96.19
September 30, 2011	4.16	94.28

<sup>(1)</sup> All prices were held constant in all future years when estimating reserves.

#### **Market Optimization**

	 Three months ended September 30					Nine months ended September 30			
(\$ millions)	2012		2011		2012		2011		
Revenues	\$ 102	\$	188	\$	320	\$	557		
Expenses									
Operating	22		9		38		26		
Purchased product	75		169		265		508		
Depreciation, depletion and amortization	3		3		9		9		
	\$ 2	\$	7	\$	8	\$	14		

Market Optimization revenues and purchased product expenses relate to activities that provide operational flexibility for transportation commitments, product type, delivery points and customer diversification. Revenues and purchased product expenses decreased in the third quarter and first nine months of 2012 compared to 2011 primarily due to lower commodity prices and lower volumes required for optimization.

### **Corporate and Other**

	Three months ended September 30				Nine months ended September 30			
(\$ millions)		2012		2011		2012		2011
Revenues	\$	(580)	\$	405	\$	(1,297)	\$	290
Expenses								
Transportation and processing		21		(2)		28		(22)
Operating		7		-		12		1
Depreciation, depletion and amortization		26		20		66		58
	\$	(634)	\$	387	\$	(1,403)	\$	253

Revenues mainly includes unrealized hedging gains or losses recorded on natural gas financial derivative contracts which result from the volatility in forward curves of commodity prices and changes in the balance of unsettled contracts between periods. Revenues in the third quarter and first nine months of 2012 resulted from the reversals of unrealized hedging gains. Transportation and processing expenses primarily reflect unrealized financial hedging gains or losses related to the Company's power financial derivative contracts. DD&A includes amortization of corporate assets, such as computer equipment, office furniture and leasehold improvements.

Comparative figures for the three and nine months ended September 30, 2011 presented above have been updated to present unrealized financial hedging gains and losses related to the Company's power financial derivative contracts in transportation and processing expenses. Formerly, these were presented in operating expenses. For additional information see Note 3 to the Interim Condensed Consolidated Financial Statements.

### **Other Operating Results**

#### **Expenses**

P million c)	Three months ended September 30					Nine months ended September 30			
(\$ millions)		2012		2011		2012		2011	
Accretion of asset retirement obligation	\$	13	\$	13	\$	40	\$	38	
Administrative		102		43		299		246	
Interest		130		103		388		346	
Foreign exchange (gain) loss, net		(160)		414		(165)		224	
Other		-		(5)		(2)		(6)	
	\$	85	\$	568	\$	560	\$	848	

Administrative expenses in 2012 have increased compared to 2011 primarily due to higher long-term compensation costs which resulted from the increases in share prices.

Foreign exchange gains and losses result from the impact of the fluctuations in the Canadian to U.S. dollar exchange rate. Foreign exchange gains and losses arise from the revaluation and settlement of U.S. dollar long-term debt issued from Canada and revaluations of other monetary assets and liabilities.

#### **Income Tax**

	Three months ended September 30			Nine months ended September 30			
(\$ millions)		2012		2011	2012		2011
Current Income Tax	\$	(85)	\$	(134)	\$ (262)	\$	(310)
Deferred Income Tax		(499)		184	(1,606)		315
Income Tax Expense (Recovery)	\$	(584)	\$	50	\$ (1,868)	\$	5

In the first nine months of 2012:

- Current income tax was a recovery of \$262 million compared to a recovery of \$310 million in 2011. The current income tax recoveries were primarily due to the carry back of tax losses to prior years.
- Total income tax expense, a recovery of \$1,868 million, decreased \$1,873 million compared to 2011 primarily due to lower net earnings before tax.

Interim income tax expense is determined using an estimated annual effective income tax rate applied to year-to-date net earnings before income tax. For the first nine months of 2012, Encana's effective tax rate was 41 percent, which includes the tax benefit from the Cutbank Ridge transaction with Mitsubishi that closed in the first quarter. Encana expects a current tax recovery for 2012.

The estimated annual effective income tax rate is impacted by expected annual earnings, along with tax benefits and expenses resulting from items including tax on divestitures and related pool adjustments, international financing and the non-taxable portions of capital gains and losses.

The estimated annual effective tax rate differs from the Canadian statutory tax rate due to permanent differences, jurisdictional tax rates, benefits of loss carry backs and adjustments to estimates. Permanent differences primarily include the tax on divestitures and related pool adjustments, the non-taxable portion of capital gains or losses, international financing and the effect of changes in legislation.

Tax interpretations, regulations and legislation in the various jurisdictions in which the Company and its subsidiaries operate are subject to change. As a result, there are tax matters under review. The Company believes that the provision for taxes is adequate.

Liquidity	and Caı	oital R	esources
-----------	---------	---------	----------

	 Three months ended September 30				Nine months ended September 30			
(\$ millions)	 2012		2011		2012		2011	
Net Cash From (Used In)								
Operating activities	\$ 1,142	\$	1,285	\$	2,390	\$	2,922	
Investing activities	(864)		(1,303)		(221)		(3,821)	
Financing activities	(148)		157		(961)		555	
Foreign exchange gain (loss) on cash and cash equivalents held in foreign currency	35		(4)		31		1	
Increase (Decrease) in Cash and Cash Equivalents	\$ 165	\$	135	\$	1,239	\$	(343)	
Cash and Cash Equivalents, End of Period	\$ 2,039	\$	356	\$	2,039	\$	356	

### **Operating Activities**

Net cash from operating activities in the third quarter of 2012 of \$1,142 million decreased \$143 million compared to the same period of 2011. This decrease is a result of the Cash Flow variances discussed in the Financial Results section of this MD&A. For the third quarter of 2012, the net change in non-cash working capital was a surplus of \$242 million compared to a surplus of \$130 million for the same period of 2011.

Net cash from operating activities in the first nine months of 2012 of \$2,390 million decreased \$532 million compared to the same period of 2011. This decrease is a result of the Cash Flow variances discussed in the Financial Results section of this MD&A, as well as the change in non-cash working capital. For the nine months ended September 30, 2012, the net change in non-cash working capital was a deficit of \$267 million compared to a deficit of \$181 million for the same period in 2011.

The Company had a working capital surplus of \$2,182 million at September 30, 2012 compared to \$881 million at December 31, 2011. The increase in working capital is primarily the result of an increase in cash and cash equivalents, a decrease in the current portion of long-term debt and a decrease in the deferred income tax liability, partially offset by lower net risk management assets. At September 30, 2012, working capital included cash and cash equivalents of \$2,039 million compared to \$800 million at December 31, 2011. Encana expects that it will continue to meet the payment terms of its suppliers.

### **Investing Activities**

Net cash used in investing activities in the first nine months of 2012 was \$221 million compared to net cash used in investing activities of \$3,821 million in the same period of 2011. The decrease in net cash used in investing activities primarily resulted from higher divestiture proceeds and lower capital expenditures. Reasons for these changes are discussed further in the Net Capital Investment section of this MD&A.

Net cash from investing activities in the first nine months of 2012 also included cash in reserve released from escrow of \$411 million. Cash in reserve includes amounts received from counterparties related to jointly controlled assets and amounts placed in escrow for a possible qualifying like-kind exchange for U.S. income tax purposes.

### **Financing Activities**

### **Long-Term Debt**

Encana's long-term debt, excluding the current portion, totaled \$7,684 million at September 30, 2012 and \$7,658 million at December 31, 2011. There was no current portion of long-term debt outstanding at September 30, 2012 compared to \$492 million at December 31, 2011. The current portion of long-term debt decreased due to the repayment of the Company's C\$500 million 4.30 percent notes that matured on March 12, 2012. There were no outstanding balances under the Company's commercial paper or revolving credit facilities at September 30, 2012 or December 31, 2011.

#### **Credit Facilities and Shelf Prospectuses**

Encana maintains two committed revolving bank credit facilities and a Canadian and a U.S. dollar shelf prospectus.

As at September 30, 2012, Encana had available unused committed revolving bank credit facilities of \$5.1 billion.

- Encana has in place a revolving bank credit facility for C\$4.0 billion (\$4.1 billion) that remains committed through October 2015, of which C\$4.0 billion (\$4.1 billion) remains unused.
- One of Encana's U.S. subsidiaries has in place a revolving bank credit facility for \$1.0 billion that remains committed through October 2015, of which \$999 million remains unused.

As at September 30, 2012, Encana had available unused capacity under shelf prospectuses for up to \$6.0 billion.

- Encana has in place a shelf prospectus whereby it may issue from time to time up to C\$2.0 billion (\$2.0 billion), or the equivalent in foreign currencies, of debt securities in Canada. At September 30, 2012, the shelf prospectus remained unutilized, the availability of which is dependent upon market conditions. The shelf prospectus expires in June 2013.
- Encana has in place a shelf prospectus whereby it may issue from time to time up to \$4.0 billion, or the
  equivalent in foreign currencies, of debt securities in the U.S. At September 30, 2012, the shelf
  prospectus remained unutilized, the availability of which is dependent upon market conditions. The shelf
  prospectus expires in June 2014.

Encana is currently in compliance with, and expects that it will continue to be in compliance with all financial covenants under its credit facility agreements. Management monitors Debt to Adjusted Capitalization as a proxy for Encana's financial covenant under its credit facility agreements which require debt to adjusted capitalization to be less than 60 percent. The definitions used in the covenant under the credit facilities adjust capitalization for historical ceiling test impairments that were recorded as at December 31, 2011. Debt to Adjusted Capitalization was 37 percent at September 30, 2012 and 33 percent at December 31, 2011.

### **Dividends**

Encana pays quarterly dividends to shareholders at the discretion of the Board of Directors. Dividend payments were \$0.20 per share totaling \$147 million for the third quarter of 2012 (2011 - \$0.20 per share totaling \$147 million) and \$0.60 per share totaling \$441 million for the nine months ended September 30, 2012 (2011 - \$0.60 per share totaling \$441 million).

#### **Outstanding Share Data**

As at September 30, 2012 and October 22, 2012, Encana had 736.3 million common shares outstanding (December 31, 2011 - 736.3 million).

### **Capital Structure**

The Company's capital structure consists of shareholders' equity plus long-term debt, including the current portion. The Company's objectives when managing its capital structure are to maintain financial flexibility to preserve Encana's access to capital markets and its ability to meet financial obligations and finance internally generated growth, as well as potential acquisitions. Encana has a long-standing practice of maintaining capital discipline, managing its capital structure and adjusting its capital structure according to market conditions to maintain flexibility while achieving the Company's objectives.

To manage the capital structure, the Company may adjust capital spending, adjust dividends paid to shareholders, purchase shares for cancellation pursuant to normal course issuer bids, issue new shares, issue new debt or repay existing debt. In managing its capital structure, the Company monitors several non-GAAP financial metrics as indicators of its overall financial strength. The financial metrics the Company currently monitors are below.

	September 30, 2012	December 31, 2011
40	_	
Debt to Debt Adjusted Cash Flow <sup>(1)</sup>	1.9x	1.8x
Debt to Adjusted EBITDA (1)	2.0x	1.9x
Debt to Adjusted Capitalization (1)	37%	33%

<sup>(1)</sup> A non-GAAP measure, which is defined under the Non-GAAP Measures section of this MD&A.

### **Commitments and Contingencies**

#### Commitments

The following table outlines the Company's commitments at September 30, 2012:

	 Expected Future Payments												
(\$ millions, undiscounted)	 2012		2013		2014		2015		2016	Th	ereafter		Total
Transportation and Processing	\$ 237	\$	896	\$	959	\$	973	\$	867	\$	6,041	\$	9,973
Drilling and Field Services	223		207		124		87		55		73		769
Operating Leases	15		51		48		44		38		103		299
Capital Commitments	79		4		-		-		-		-		83
Commitments	\$ 554	\$	1,158	\$	1,131	\$	1,104	\$	960	\$	6,217	\$	11,124

The Company expects to fund its 2012 commitments from Cash Flow.

Contractual obligations arising from long-term debt, asset retirement obligations, capital leases, The Bow office project and the Deep Panuke Production Field Centre are recognized on the Company's balance sheet. Further information can be found in the note disclosures to the Interim Condensed Consolidated Financial Statements.

#### **Results of Independent Investigation**

In June 2012, Encana's independent Directors authorized its Chairman, Mr. David O'Brien, to oversee an investigation into allegations of collusion with competitors regarding land leasing in Michigan in 2010. External legal counsel were retained in both the United States and Canada to assist in undertaking a thorough investigation, which was conducted independent of the Company's management. Based on the results of the investigation, the Board has concluded that Encana did not engage in such conduct. The Company has received a subpoena from the Antitrust Division of the United States Department of Justice and a civil investigatory demand from the Michigan Attorney General and is cooperating fully with the investigations of both agencies. It is possible that Encana may become a defendant or involved in potential legal actions, including class actions, in connection with matters relating to the allegations.

### Contingencies

The Company is involved in various legal claims and actions arising in the ordinary course of operations. Although the outcome of these claims cannot be predicted with certainty, the Company does not expect these matters to have a material adverse effect on Encana's financial position, cash flows or results of operations. If an unfavorable outcome were to occur, there exists the possibility of a material adverse impact on the Company's consolidated net earnings or loss in the period in which the outcome is determined. Accruals for litigation and claims are recognized if the Company determines that the loss is probable and the amount can be reasonably estimated. The Company believes it has made adequate provision for such legal claims.

### **Risk Management**

Encana's business, prospects, financial condition, results of operation and cash flows, and in some cases its reputation, are impacted by risks that are categorized as follows:

- financial risks;
- operational risks; and
- safety, environmental and regulatory risks.

Issues affecting, or with the potential to affect, Encana's reputation are generally of a strategic nature or emerging issues that can be identified early and then managed, but occasionally include unforeseen issues that arise unexpectedly and must be managed on an urgent basis. Encana takes a proactive approach to the identification and management of issues that affect the Company's reputation and has established consistent and clear policies, procedures, guidelines and responsibilities for identifying and managing these issues.

Encana continues to implement its business model of focusing on developing low-risk and low-cost long-life resource plays, which allows the Company to respond well to market uncertainties. Management adjusts financial and operational risk strategies to proactively respond to changing economic conditions and to mitigate or reduce risk.

### **Financial Risks**

Encana defines financial risks as the risk of loss or lost opportunity resulting from financial management and market conditions that could have a positive or negative impact on Encana's business.

Financial risks include, but are not limited to:

- market pricing of natural gas and liquids;
- credit and liquidity;
- foreign exchange rates; and
- interest rates.

Encana partially mitigates its exposure to financial risks through the use of various financial instruments and physical contracts. The use of derivative financial instruments is governed under formal policies and is subject to limits established by the Board of Directors. All derivative financial agreements are with major financial institutions in Canada and the U.S. or with counterparties having investment grade credit ratings.

To partially mitigate commodity price risk, the Company may enter into transactions that fix or set a floor and cap on prices. To help protect against regional price differentials, Encana executes transactions to manage the price differentials between its production areas and various sales points. Further information, including the details of Encana's financial instruments as at September 30, 2012, is disclosed in Note 15 to the Interim Condensed Consolidated Financial Statements.

Counterparty and credit risks are regularly and proactively managed. A substantial portion of Encana's credit exposure is with customers in the oil and gas industry or financial institutions. This credit exposure is mitigated through the use of Board-approved credit policies governing the Company's credit portfolio including credit practices that limit transactions and grant payment terms according to counterparties' credit quality.

The Company manages liquidity risk using cash and debt management programs. The Company has access to cash equivalents and a wide range of funding alternatives at competitive rates through commercial paper, committed revolving bank credit facilities and debt capital markets. Encana closely monitors the Company's ability to access cost effective credit and ensures that sufficient liquidity is in place to fund capital expenditures and dividend payments. The Company minimizes its liquidity risk by managing its capital structure. In managing the capital structure, the Company may adjust capital spending, adjust dividends paid to shareholders, purchase shares for cancellation pursuant to normal course issuer bids, issue new shares, issue new debt or repay existing debt.

### **Operational Risks**

Operational risks are defined as the risk of loss or lost opportunity resulting from the following:

- · reserves and resources replacement;
- capital activities; and
- operating activities.

The Company's ability to operate, generate cash flows, complete projects, and value reserves and resources is subject to financial risks, including commodity prices mentioned above, continued market demand for its products and other risk factors outside of its control, which include: general business and market conditions; economic recessions and financial market turmoil; the overall state of the capital markets, including investor appetite for investments in the oil and gas industry generally and the Company's securities in particular; the ability to secure and maintain cost effective financing for its commitments; legislative, environmental and regulatory matters; unexpected cost increases; royalties; taxes; the availability of drilling and other equipment; the ability to access lands; the ability to access water for hydraulic fracturing operations; weather; the availability of processing capacity; the availability and proximity of pipeline capacity; technology failures; accidents; the availability of skilled labour; and reservoir quality. If Encana fails to acquire or find additional natural gas and liquids reserves and resources, its reserves, resources and production will decline materially from their current levels and, therefore, its cash flows are highly dependent upon successfully exploiting current reserves and resources and acquiring, discovering or developing additional reserves and resources. To mitigate these risks, as part of the capital approval process, the Company's projects are evaluated on a fully risked basis, including geological risk and engineering risk.

When making operating and investing decisions, Encana's business model allows flexibility in capital allocation to optimize investments focused on project returns, long-term value creation and risk mitigation. Encana also mitigates operational risks through a number of other policies, systems and processes as well as by maintaining a comprehensive insurance program.

#### Safety, Environmental and Regulatory Risks

The Company is committed to safety in its operations and has high regard for the environment and stakeholders, including regulators. The Company's business is subject to all of the operating risks normally associated with the exploration for, development of and production of natural gas, oil and NGLs and the operation of midstream facilities. When assessing the materiality of the environmental risk factors, Encana takes into account a number of qualitative and quantitative factors, including, but not limited to, financial, operational, reputational and regulatory aspects of the identified risk factor. These risks are managed by executing policies and standards that are designed to comply with or exceed government regulations and industry standards. In addition, Encana maintains a system that identifies, assesses and controls safety, security and environmental risk and requires regular reporting to Senior Management and the Board of Directors. The Corporate Responsibility, Environment, Health & Safety Committee of Encana's Board of Directors provides recommended environmental policies for approval by Encana's Board of Directors and oversees compliance with government laws and regulations. Monitoring and

reporting programs for environmental, health and safety performance in day-to-day operations, as well as inspections and audits, are designed to provide assurance that environmental and regulatory standards are met. Contingency plans are in place for a timely response to environmental events and remediation/reclamation strategies are utilized to restore the environment.

Encana's operations are subject to regulation and intervention by governments that can affect or prohibit the drilling, completion, including hydraulic fracturing and tie-in of wells, production, the construction or expansion of facilities and the operation and abandonment of fields. Changes in government regulation could impact the Company's existing and planned projects as well as impose a cost of compliance.

A comprehensive discussion of Encana's Risk Management is provided in the Company's U.S. GAAP MD&A for the year ended December 31, 2011.

### **Accounting Policies and Estimates**

### **Critical Accounting Estimates**

Management is required to make judgments, assumptions and estimates in applying its accounting policies and practices, which have a significant impact on the financial results of the Company. A summary of Encana's significant accounting policies can be found in Note 1 to the U.S. GAAP Consolidated Financial Statements for the year ended December 31, 2011. The following discussion outlines the accounting policies and practices involving the use of estimates that are critical to determining Encana's financial results.

#### **Upstream Assets and Reserves**

Encana follows U.S. GAAP full cost accounting for natural gas, oil and NGL activities. Reserves estimates can have a significant impact on net earnings, as they are a key input to the Company's depletion and ceiling test impairment calculations. A downward revision in reserves estimates may increase depletion expense and may also result in a ceiling test impairment. A ceiling test impairment is recognized in net earnings when the carrying amount of a country cost centre exceeds the country cost centre ceiling. The carrying amount of a cost centre includes capitalized costs of proved oil and gas properties, net of accumulated depletion and the related deferred income taxes. The cost centre ceiling is the sum of the estimated after-tax future net cash flows from proved reserves as calculated under SEC requirements, using the 12-month average trailing prices and unescalated future development and production costs, discounted at 10 percent, plus unproved property costs. The 12-month average trailing price is calculated as the average of the prices on the first day of each month within the 12-month period. Any excess of the carrying amount over the calculated ceiling is recognized as an impairment in net earnings. During 2011 and 2012, Encana recorded ceiling test impairments, which are discussed further in the Divisional Results section of this MD&A.

Annually, all of Encana's natural gas, oil and NGL reserves and resources are evaluated and reported on by independent qualified reserves evaluators. The estimation of reserves is a subjective process. Estimates are based on engineering data, projected future rates of production, and the timing of future expenditures, all of which are subject to numerous uncertainties and various interpretations. Reserves estimates can be revised upward or downward based on the results of future drilling, testing, production levels and economics of recovery.

#### **Asset Retirement Obligation**

The fair value of estimated asset retirement obligations is recognized in the Consolidated Balance Sheet when incurred and a reasonable estimate of fair value can be made. Asset retirement obligations are those legal obligations where the Company will be required to retire tangible long-lived assets such as producing well sites, offshore production platforms and natural gas processing plants. The asset retirement cost, equal to the initially estimated fair value of the asset retirement obligation, is capitalized as part of the cost of the related long-lived asset. Changes in the estimated obligation resulting from revisions to estimated timing or amount of undiscounted cash flows are recognized as a change in the asset retirement obligation and the related asset retirement cost.

The asset retirement obligation is estimated by discounting the expected future cash flows of the settlement. The discounted cash flows are based on estimates of such factors as reserves lives, retirement costs, timing of settlements, credit-adjusted risk-free rates and inflation rates. These estimates will impact net earnings through accretion of the asset retirement obligation in addition to depletion of the asset retirement cost included in property, plant and equipment. Actual expenditures incurred are charged against the accumulated asset retirement obligation.

#### Goodwill

Goodwill, which represents the excess of purchase price over fair value of net assets acquired, is assessed for impairment at least annually at December 31. Goodwill and all other assets and liabilities are allocated to reporting units, which are Encana's country cost centres. To assess impairment, the carrying amount of each reporting unit is determined and compared to the fair value of the reporting unit. If the carrying amount of the reporting unit is higher than the fair value then goodwill is written down to the implied fair value of goodwill. The implied fair value of goodwill is determined by deducting the fair value of the reporting unit's assets and liabilities from the fair value of the reporting unit. Any excess of the carrying value of goodwill over the implied fair value of goodwill is recognized as an impairment and charged to net earnings. Subsequent measurement of goodwill is at cost less accumulated impairments.

The fair value used in the impairment test is based on estimates of discounted future cash flows which involves assumptions of natural gas and liquids reserves, including commodity prices, future costs and discount rates. Encana has assessed its goodwill for impairment and has determined that no write-down is required.

#### **Income Taxes**

Encana follows the liability method of accounting for income taxes. Under this method, deferred income taxes are recorded for the effect of any temporary difference between the accounting and income tax basis of an asset or liability, using the enacted income tax rates and laws expected to apply when the assets are realized and liabilities are settled. Current income taxes are measured at the amount expected to be recoverable from or payable to the taxation authorities based on the income tax rates and laws enacted at the end of the reporting period. The effect of a change in the enacted tax rates or laws is recognized in net earnings in the period of enactment.

Deferred income tax assets are initially recognized and a corresponding valuation allowance is recorded to reduce deferred tax assets to the extent that it is no longer more likely than not that sufficient taxable earnings will be available to allow all or part of the assets to be recovered. Encana routinely assesses deferred tax assets to ensure they are realizable.

Encana's interim income tax expense is determined using an estimated annual effective income tax rate applied to year-to-date net earnings before income tax. The estimated annual effective income tax rate is impacted by the expected annual earnings along with the tax benefits and expenses resulting from items including tax on divestitures and related pool adjustments, international financing and the non-taxable portions of capital gains or losses.

Encana recognizes the financial statement effects of a tax position when it is more likely than not, based on the technical merits, that the position will be sustained upon examination by a taxing authority. A recognized tax position is initially and subsequently measured as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon settlement with a taxing authority. Liabilities for unrecognized tax benefits that are not expected to be settled within the next 12 months are included in other liabilities and provisions.

Tax interpretations, regulations and legislation in the various jurisdictions in which the Company and its subsidiaries operate are subject to change. As such, income taxes are subject to measurement uncertainty and the interpretations can impact net earnings through the income tax expense arising from the changes in deferred income tax assets or liabilities.

#### **Derivative Financial Instruments**

As described in the Risk Management section of this MD&A, derivative financial instruments are used by Encana to manage its exposure to market risks relating to commodity prices, foreign currency exchange rates and interest rates. The Company's policy is not to utilize derivative financial instruments for speculative purposes.

Derivative financial instruments are measured at fair value with changes in fair value recognized in net earnings. The fair values recorded in the Consolidated Balance Sheet reflect netting the asset and liability positions where counterparty master netting arrangements contain provisions for net settlement. Realized gains or losses from financial derivatives related to natural gas and oil commodity prices are recognized in revenues as the contracts are settled. Realized gains or losses from financial derivatives related to power commodity prices are recognized in transportation and processing expenses as the related power contracts are settled. Unrealized gains and losses are recognized in revenues and transportation and processing expenses accordingly, at the end of each respective reporting period based on the changes in fair value of the contracts.

The estimate of fair value of all derivative instruments is based on quoted market prices or, in their absence, third-party market indications and forecasts. The estimated fair value of financial assets and liabilities is subject to measurement uncertainty.

### **Recent Accounting Pronouncements**

On January 1, 2012, Encana adopted the following standards and updates issued by the Financial Accounting Standards Board ("FASB"), which have not had a material impact on the Company's Interim Condensed Consolidated Financial Statements:

- Accounting Standards Update 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS, clarifies and changes existing fair value measurement and disclosure requirements. The amendments have been applied prospectively and have not had a significant impact on the Company's fair value measurements or disclosures.
- Accounting Standards Update 2011-05, Presentation of Comprehensive Income, requires that net earnings and comprehensive income be presented either in a single continuous statement or in two separate consecutive statements. As Encana presents its net earnings and comprehensive income in two separate consecutive statements, the amendments had no impact on the Company's financial statement presentation. Accounting Standards Update 2011-12, Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05, defers the effective date of certain presentation requirements for items reclassified out of accumulated other comprehensive income to net earnings.
- Accounting Standards Update 2011-08, Intangibles Goodwill and Other, permits an initial assessment of
  qualitative factors to determine whether the two-step goodwill impairment test is required to be performed as
  described in Accounting Standards Codification Topic 350, Intangibles Goodwill and Other. The
  amendments have been applied prospectively.

### Non-GAAP Measures

Certain measures in this document do not have any standardized meaning as prescribed by U.S. GAAP and therefore, are considered non-GAAP measures. These measures may not be comparable to similar measures presented by other issuers. These measures are commonly used in the oil and gas industry and by Encana to provide shareholders and potential investors with additional information regarding the Company's liquidity and its ability to generate funds to finance its operations. Non-GAAP measures include Cash Flow, Cash Flow per share - diluted, Operating Earnings, Operating Earnings per share - diluted, Debt to Debt Adjusted Cash Flow, Debt to Adjusted EBITDA and Debt to Adjusted Capitalization. Management's use of these measures is discussed further below.

#### Cash Flow

Cash Flow is a non-GAAP measure commonly used in the oil and gas industry and by Encana to assist Management and investors in measuring the Company's ability to finance capital programs and meet financial obligations. Cash Flow is defined as cash from operating activities excluding net change in other assets and liabilities, net change in non-cash working capital and cash tax on sale of assets.

### **Operating Earnings**

Operating Earnings is a non-GAAP measure that adjusts Net Earnings by non-operating items that Management believes reduces the comparability of the Company's underlying financial performance between periods. Operating Earnings is commonly used in the oil and gas industry and by Encana to provide investors with information that is more comparable between periods.

Operating Earnings is defined as Net Earnings excluding non-recurring or non-cash items that Management believes reduces the comparability of the Company's financial performance between periods. These after-tax items may include, but are not limited to, unrealized hedging gains/losses, impairments, foreign exchange gains/losses, income taxes related to divestitures and adjustments to normalize the effect of income taxes calculated using the estimated annual effective tax rate.

In conjunction with adopting U.S. GAAP, the Company has updated its guarterly Operating Earnings definition to calculate income taxes based on the discrete quarter results and exclude income taxes related to divestitures. The 2011 and 2010 quarterly comparatives have been restated with no impact on annual Operating Earnings.

#### **Debt to Debt Adjusted Cash Flow**

Debt to Debt Adjusted Cash Flow is a non-GAAP measure monitored by Management as an indicator of the Company's overall financial strength. Debt Adjusted Cash Flow is a non-GAAP measure defined as Cash Flow on a trailing 12-month basis excluding interest expense after tax.

(\$ millions)	Septem	ber 30, 2012	December 31, 2011		
Debt	\$	7,684	\$	8,150	
Cash Flow		3,711		4,216	
Interest Expense, after tax		381		344	
Debt Adjusted Cash Flow	\$	4,092	\$	4,560	
Debt to Debt Adjusted Cash Flow		1.9x		1.8x	

### **Debt to Adjusted EBITDA**

Debt to Adjusted EBITDA is a non-GAAP measure monitored by Management as an indicator of the Company's overall financial strength. Adjusted EBITDA is a non-GAAP measure defined as trailing 12-month Net Earnings before income taxes, foreign exchange gains or losses, interest, accretion of asset retirement obligation, DD&A, impairments, unrealized hedging gains and losses and other expenses.

_ (\$ millions)	September 30, 2012					
Debt	\$	7,684	\$	8,150

Other		25		21		
Adjusted EBITDA	\$	3,823	\$	4,346		
Debt to Adjusted EBITDA		2.0x		1.9x		

### **Debt to Adjusted Capitalization**

Debt to Adjusted Capitalization is a non-GAAP measure, which adjusts capitalization for historical ceiling test impairments that were recorded as at December 31, 2011. Management monitors Debt to Adjusted Capitalization as a proxy for Encana's financial covenant under its credit facility agreements which require debt to adjusted capitalization to be less than 60 percent. Adjusted Capitalization includes debt, shareholders' equity and an equity adjustment for ceiling test impairments recognized as at December 31, 2011.

(\$ millions)	Septem	ber 30, 2012	December 31, 2011

### Advisory

### Forward-Looking Statements

In the interest of providing Encana shareholders and potential investors with information regarding the Company and its subsidiaries, including Management's assessment of Encana's and its subsidiaries' future plans and operations, certain statements contained in this document constitute forward-looking statements or information (collectively referred to herein as "forward-looking statements") within the meaning of the "safe harbour" provisions of applicable securities legislation. Forward-looking statements are typically identified by words such as anticipate", "believe", "expect", "plan", "intend", "forecast", "target", "project", "objective", "strategy", "strives" or similar words suggesting future outcomes or statements regarding an outlook. Forward-looking statements in this document include, but are not limited to, statements with respect to: achieving the Company's business objectives of growing its portfolio to produce natural gas, oil and NGLs, maintaining financial strength, optimizing capital investments, continuing to pay a stable dividend; long-term strategy of accelerating value recognition of assets; achieving operating efficiencies, lowering cost structures and success of resource play hub model; balancing capital investment to build long-term production growth capacity with near term market uncertainty; planned 2012 capital investment of \$3.5 billion, including additional capital investment of \$600 million to be funded by cash in order to increase liquids cash flow contribution in 2013; developing a more diversified production and cash flow portfolio; expectation for proceeds from planned divestitures and joint venture transaction to provide additional financial flexibility; expected reduction in capital program for drier natural gas plays while directing greater investment towards oil and liquids-rich development and exploration opportunities; plans to shut-in certain volume of natural gas production from existing wells in 2012; ability to expand natural gas markets in North America and potential development of liquefied natural gas export terminal in British Columbia; amount of additional investments and funding commitment expected from the Company's joint ventures; projections contained in the 2012 Corporate Guidance (including estimates of cash flow including per share, natural gas, oil and NGLs production, capital investment and its allocation, net divestitures, operating costs, and 2012 estimated sensitivities of cash flow and operating earnings); estimates of reserves and resources; expectation that the discounted aftertax future net cash flows from proved reserves used in ceiling test calculations is not indicative of the fair market value of Encana's oil and gas properties or of the future net cash flows expected to be generated from such properties; potential joint venture transactions and third party investments and expectation for the same to reduce capital investments and improve project returns; projections relating to the adequacy of the Company's provision for taxes and legal claims; possibility of legal actions in connection with the matters relating to the allegations of collusion with competitors regarding land leasing in Michigan in 2010; the flexibility of capital spending plans and the source of funding therefore; the benefits of the Company's risk management program, including the impact of derivative financial instruments; projections that the Company has access to cash equivalents and a wide range of funding at competitive rates; the Company's ability to meet payment terms of its suppliers and be in compliance with all financial covenants under its credit facility agreements; expectation to fund 2012 commitments from Cash Flow; the effect of the Company's risk mitigation policies, systems, processes and insurance program; the Company's expectations for future Debt to Debt Adjusted Cash Flow, Debt to Adjusted EBITDA and Debt to Adjusted Capitalization ratios; and the expected impact and timing of various accounting pronouncements, rule changes and standards on the Company and its financial statements.

Readers are cautioned not to place undue reliance on forward-looking statements, as there can be no assurance that the plans, intentions or expectations upon which they are based will occur. By their nature, forward-looking statements involve numerous assumptions, known and unknown risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts, projections and other forward-looking statements will not occur, which may cause the Company's actual performance and financial results in future periods to differ materially from any estimates or projections of future performance or results expressed or implied by such forward-looking statements. These assumptions, risks and uncertainties include, among other things: volatility of, and assumptions regarding natural gas and liquids prices, including substantial or extended decline of the same and their adverse effect on the Company's operations and financial condition and the value and amount of its reserves; assumptions based upon the Company's current guidance; fluctuations in currency and interest rates; risk that the Company may not conclude divestitures of certain assets or other transactions (including thirdparty capital investments, farm-outs or partnerships, which Encana may refer to from time to time as "partnerships" or "joint ventures", regardless of the legal form) as a result of various conditions not being met;

product supply and demand; market competition; risks inherent in the Company's and its subsidiaries' marketing operations, including credit risks; imprecision of reserves estimates and estimates of recoverable quantities of natural gas and liquids from resource plays and other sources not currently classified as proved, probable or possible reserves or economic contingent resources, including future net revenue estimates; marketing margins; potential disruption or unexpected technical difficulties in developing new facilities; unexpected cost increases or technical difficulties in constructing or modifying processing facilities; risks associated with technology; the Company's ability to acquire or find additional reserves; hedging activities resulting in realized and unrealized losses; business interruption and casualty losses; risk of the Company not operating all of its properties and assets; counterparty risk; downgrade in credit rating and its adverse effects; liability for indemnification obligations to third parties; variability of dividends to be paid; its ability to generate sufficient cash flow from operations to meet its current and future obligations; its ability to access external sources of debt and equity capital; the timing and the costs of well and pipeline construction; the Company's ability to secure adequate product transportation; changes in royalty, tax, environmental, greenhouse gas, carbon, accounting and other laws or regulations or the interpretations of such laws or regulations; political and economic conditions in the countries in which the Company operates; terrorist threats; risks associated with existing and potential future lawsuits and regulatory actions made against the Company; risk arising from price basis differential; risk arising from inability to enter into attractive hedges to protect the Company's capital program; and other risks and uncertainties described from time to time in the reports and filings made with securities regulatory authorities by Encana. Although Encana believes that the expectations represented by such forward-looking statements are reasonable, there can be no assurance that such expectations will prove to be correct. Readers are cautioned that the foregoing list of important factors is not exhaustive. Furthermore, the forward-looking statements contained in this document are made as of the date hereof and, except as required by law, Encana undertakes no obligation to update publicly or revise any forward-looking statements, whether as a result of new information, future events or otherwise. The forward-looking statements contained in this document are expressly qualified by this cautionary statement.

Forward-looking information respecting anticipated 2012 cash flow for Encana is based upon, among other things, achieving average production for 2012 of 3.0 Bcf/d of natural gas and 30,000 bbls/d of liquids, commodity prices for natural gas and liquids based on NYMEX \$3.25 per Mcf and WTI of \$95 per bbl, an estimated U.S./Canadian dollar foreign exchange rate of \$1.00 and a weighted average number of outstanding shares for Encana of approximately 736 million. Forward-looking information respecting anticipated 2013 cash flow for Encana is based upon achieving average production for 2013 of between 2.9 Bcf/d and 3.1 Bcf/d of natural gas and 60,000 bbls/d to 70,000 bbls/d of liquids, commodity prices for natural gas and liquids based on NYMEX \$3.50 per Mcf and WTI of \$90 per bbl, an estimated U.S./Canadian dollar foreign exchange rate of \$1.00 and a weighted average number of outstanding shares for Encana of approximately 736 million.

Forward-looking statements with respect to matters relating to allegations of collusion with competitors regarding land leasing in Michigan in 2010 are qualified by the fact that, while Encana intends to vigorously defend against any claims of liability alleged in any lawsuits arising out of such allegations, the Company cannot predict the outcome of any governmental investigations or the commencement or outcome of any future legal proceedings involving Encana or whether such proceedings would lead to monetary damages which could have a material adverse effect on the Company's financial position, or whether there will be other proceedings arising out of these allegations.

Assumptions relating to forward-looking statements generally include Encana's current expectations and projections made in light of, and generally consistent with, its historical experience and its perception of historical trends, including the conversion of resources into reserves and production as well as expectations regarding rates of advancement and innovation, generally consistent with and informed by its past experience, all of which are subject to the risk factors identified elsewhere in this document.

Encana is required to disclose events and circumstances that occurred during the period to which this MD&A relates that are reasonably likely to cause actual results to differ materially from material forward-looking statements for a period that is not yet complete that Encana has previously disclosed to the public and the expected differences thereto. Such disclosure can be found in Encana's news release dated October 24, 2012, which is available on Encana's website at <a href="https://www.secana.com">www.secana.com</a>, on SEDAR at <a href="https://www.secana.com">www.secana.com</a> and EDGAR at <a href="https://www.secana.com">www.secana.com</a>, on SEDAR at <a href="https://www.secana.com">www.secana.com</a> and EDGAR at <a href="https://www.secana.com">www.secana.com</a>, on SEDAR at <a href="https://www.secana.com">www.secana.com</a> and EDGAR at <a href="https://www.secana.com">www.secana.com</a>, on SEDAR at <a href="ht

#### Oil and Gas Information

National Instrument 51-101 of the Canadian Securities Administrators imposes oil and gas disclosure standards for Canadian public companies engaged in oil and gas activities. Prior to 2011, Encana relied upon an exemption from NI 51-101 granted by Canadian securities regulatory authorities to permit it to provide disclosure relating to reserves and other oil and gas information in accordance with U.S. disclosure requirements. Subsequent to the expiry of that exemption, Encana has provided and continues to provide disclosure which complies with the annual disclosure requirements of NI 51-101 in the Company's AIF. The Canadian protocol disclosure is contained in Appendix A and under "Narrative Description of the Business" in the AIF. Encana has obtained an exemption dated January 4, 2011 from certain requirements of NI 51-101 to permit it to provide certain disclosure prepared in accordance with U.S. disclosure requirements, in addition to the Canadian protocol disclosure. The Company's U.S. GAAP U.S. protocol disclosure is included in Note 24 (unaudited) to the Company's U.S. GAAP Consolidated Financial Statements for the year ended December 31, 2011.

A description of the primary differences between the disclosure requirements under the Canadian standards and the disclosure requirements under the U.S. standards is set forth under the heading "Reserves and Other Oil and Gas Information" in the AIF.

#### Natural Gas, Oil and NGLs Conversions

In this document, certain oil and NGL volumes have been converted to cubic feet equivalent (cfe) on the basis of one barrel (bbl) to six thousand cubic feet (Mcf). Cfe may be misleading, particularly if used in isolation. A conversion ratio of one bbl to six Mcf is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent value equivalency at the wellhead.

Given that the value ratio based on the current price of oil as compared to natural gas is significantly different from the energy equivalency of 6:1, utilizing a conversion on a 6:1 basis may be misleading as an indication of value.

### **Resource Play**

Resource play is a term used by Encana to describe an accumulation of hydrocarbons known to exist over a large areal expanse and/or thick vertical section, which when compared to a conventional play typically has a lower geological and/or commercial development risk and lower average decline rate.

### **Currency and References to Encana**

All information included in this document and the Interim Condensed Consolidated Financial Statements and comparative information is shown on a U.S. dollar, after royalties basis unless otherwise noted. References to C\$ are to Canadian dollars. Encana's functional currency is Canadian dollars, however, the Company has adopted the U.S. dollar as its presentation currency to facilitate a more direct comparison to other North American oil and gas companies. All proceeds from divestitures are provided on a before-tax basis.

For convenience, references in this document to "Encana", the "Company", "we", "us", "our" and "its" may, where applicable, refer only to or include any relevant direct and indirect subsidiary corporations and partnerships ("Subsidiaries") of Encana Corporation, and the assets, activities and initiatives of such Subsidiaries.

#### **Additional Information**

Further information regarding Encana Corporation, including its Annual Information Form, can be accessed under the Company's public filings found on SEDAR at <a href="www.sedar.com">www.sedar.com</a>, on EDGAR at <a href="www.sec.gov">www.sec.gov</a> and on the Company's website at <a href="www.encana.com">www.encana.com</a>.

## 1. Basis of Presentation

Encana Corporation and its subsidiaries ("Encana" or "the Company") are in the business of the exploration for, the development of, and the production and marketing of natural gas, oil and natural gas liquids ("NGLs"). The term liquids is used to represent Encana's oil, NGLs and condensate.

The interim Condensed Consolidated Financial Statements include the accounts of Encana and are presented in accordance with accounting principles generally accepted in the United States ("U.S. GAAP").

The interim Condensed Consolidated Financial Statements have been prepared following the same accounting policies and methods of computation as the annual audited U.S. GAAP Consolidated Financial Statements for the year ended December 31, 2011, except as noted below in Note 2. The disclosures provided below are incremental to those included with the annual audited U.S. GAAP Consolidated Financial Statements. Certain information and disclosures normally required to be included in the notes to the annual audited U.S. GAAP Consolidated Financial Statements have been condensed or have been disclosed on an annual basis only. Accordingly, the interim Condensed Consolidated Financial Statements should be read in conjunction with the annual audited U.S. GAAP Consolidated Financial Statements and the notes thereto for the year ended December 31, 2011.

These unaudited interim Condensed Consolidated Financial Statements reflect, in the opinion of Management, all normal and recurring adjustments necessary to present fairly the financial position and results of the Company as at and for the periods presented. Interim condensed consolidated financial results are not necessarily indicative of consolidated financial results expected for the fiscal year.

# 2. Changes in Accounting Policies and Practices

On January 1, 2012, Encana adopted the following standards and updates issued by the Financial Accounting Standards Board ("FASB"), which have not had a material impact on the Company's interim Condensed Consolidated Financial Statements:

- Accounting Standards Update 2011-04, "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS", clarifies and changes existing fair value measurement and disclosure requirements. The amendments have been applied prospectively and have not had a significant impact on the Company's fair value measurements or disclosures.
- Accounting Standards Update 2011-05, "Presentation of Comprehensive Income", requires that net earnings and comprehensive income be presented either in a single continuous statement or in two separate consecutive statements. As Encana presents its net earnings and comprehensive income in two separate consecutive statements, the amendments had no impact on the Company's financial statement presentation. Accounting Standards Update 2011-12, "Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05", defers the effective date of certain presentation requirements for items reclassified out of accumulated other comprehensive income to net earnings.
- Accounting Standards Update 2011-08, "Intangibles Goodwill and Other", permits an initial assessment of qualitative factors to determine whether the two-step goodwill impairment test is required to be performed as described in Accounting Standards Codification Topic 350, "Intangibles - Goodwill and Other". The amendments have been applied prospectively.

(All amounts in \$ millions unless otherwise specified)

# 3. Segmented Information

Encana's reportable segments are determined based on the Company's operations and geographic locations as follows:

- Canadian Division includes the exploration for, development of, and production of natural gas, oil and NGLs and other related activities within the Canadian cost centre. Five key resource plays are located in the Division: (i) Greater Sierra in northeast British Columbia, including Horn River; (ii) Peace River Arch in northwest Alberta; (iii) Cutbank Ridge in northern British Columbia; (iv) Bighorn in west central Alberta; and (v) Coalbed Methane ("CBM") in southern Alberta. The Canadian Division also includes the Deep Panuke natural gas project offshore Nova Scotia.
- **USA Division** includes the exploration for, development of, and production of natural gas, oil and NGLs and other related activities within the U.S. cost centre. Four key resource plays are located in the Division: (i) Jonah in southwest Wyoming; (ii) Piceance in northwest Colorado; (iii) Haynesville in Louisiana; and (iv) Texas.
- Market Optimization is primarily responsible for the sale of the Company's proprietary production. These results are
  included in the Canadian and USA Divisions. Market optimization activities include third-party purchases and sales of
  product that provide operational flexibility for transportation commitments, product type, delivery points and customer
  diversification. These activities are reflected in the Market Optimization segment.
- Corporate and Other mainly includes unrealized gains or losses recorded on derivative financial instruments. Once
  amounts are settled, the realized gains and losses are recorded in the reporting segment to which the derivative
  instrument relates.

Market Optimization sells substantially all of the Company's upstream production to third-party customers. Transactions between segments are based on market values and are eliminated on consolidation.

The Condensed Consolidated Statement of Earnings for the comparative period ended September 30, 2011 and the accompanying segmented information disclosed in this note have been updated to present processing costs with transportation expense. Formerly, these processing costs were presented in operating expenses. Encana has updated its presentation as a result of the Canadian Division entering into firm gathering and processing agreements associated with the divestiture of its two natural gas processing plants during the first quarter of 2012 as disclosed in Note 4. Encana believes the nature of processing costs more closely align with transportation expense. As a result, the Company has reclassified \$52 million from operating expense to transportation and processing expense for the three months ended September 30, 2011 and \$182 million for the nine months ended September 30, 2011 (\$240 million - 12 months ended December 31, 2011).

In conjunction with the reclassification of the Canadian Division processing costs discussed above, Encana has reclassified the unrealized financial hedging gains and losses related to the Company's power financial derivative contracts to transportation and processing within the Corporate and Other segment. Formerly, these were presented in operating expenses. Encana has updated its presentation to align the treatment with realized financial hedging gains and losses, which are now included in the Canadian Division transportation and processing expenses. The Condensed Consolidated Statement of Earnings and the accompanying segmented information disclosed in this note, along with the impact of realized and unrealized gains and losses on risk management activities disclosed in Note 15, have been updated accordingly.

Net Acquisitions and Divestitures	\$ 31	\$ (4)	\$ (2,337)	\$ (27)		

#### Acquisitions

For the nine months ended September 30, 2012, acquisitions in the Canadian and USA Divisions totaled \$361 million (2011 - \$468 million), which primarily included land and property purchases with oil and liquids-rich production potential.

#### **Divestitures**

For the nine months ended September 30, 2012, divestitures were \$2,505 million (2011 - \$150 million) in the Canadian Division and \$191 million (2011 - \$345 million) in the USA Division. During the nine months ended September 30, 2012, the Canadian Division received approximately C\$1.45 billion from Mitsubishi Corporation ("Mitsubishi"), approximately C\$100 million from Toyota Tsusho Corporation ("Toyota Tsusho") and C\$920 million for the sale of two natural gas processing plants in British Columbia and Alberta. During the nine months ended September 30, 2012, the USA Division received proceeds of \$114 million from the divestiture of the remaining North Texas natural gas producing assets. In December 2011, the Company closed the majority of the North Texas asset sale for proceeds of \$836 million. During the nine months ended September 30, 2011, the USA Division sold its Fort Lupton natural gas processing plant for proceeds of \$296 million. Amounts received from these divestitures have been deducted from the respective Canadian and U.S. full cost pools.

(All amounts in \$ millions unless otherwise specified)

#### 4. Acquisitions and Divestitures (continued)

In February 2012, Encana entered into a partnership agreement with Mitsubishi for the development of certain Cutbank Ridge lands in British Columbia. Under the agreement, Encana owns 60 percent and Mitsubishi owns 40 percent of the partnership. Mitsubishi initially invested C\$1.45 billion on closing and will invest approximately C\$1.45 billion, in addition to its 40 percent of the partnership's future capital investment, for a commitment period which is expected to be about five years, thereby reducing Encana's capital funding commitments to 30 percent of the total expected capital investment over that period. The transaction closed on February 24, 2012 and C\$1.45 billion was received.

In April 2012, the Company entered into an agreement with Toyota Tsusho under which Toyota Tsusho invested approximately C\$100 million upon closing the transaction and will invest approximately C\$500 million over the next seven years to acquire a 32.5 percent gross overriding royalty interest in natural gas production from a portion of Encana's CBM resource play. The transaction closed on April 19, 2012.

Encana's interim income tax expense is determined using an estimated annual effective income tax rate applied to year-to-date net earnings before income tax. The estimated annual effective income tax rate is impacted by the expected annual earnings, along with the tax benefits and expenses resulting from items including tax on divestitures and related pool adjustments, international financing and the non-taxable portions of capital gains or losses.

<sup>\*</sup> Depreciation, depletion and amortization.

The Canadian Division and USA Division property, plant and equipment include internal costs directly related to exploration, development and construction activities of \$364 million capitalized during the nine months ended September 30, 2012 (2011 - \$306 million). Costs classified as indirect administrative costs have not been capitalized as part of the capital expenditures. Included in Corporate and Other are \$103 million (\$112 million at December 31, 2011) of international property costs, which have been fully impaired.

For the three months ended September 30, 2012, the Company recognized a ceiling test impairment of \$1,074 million (2011 - nil) in the Canadian cost centre and \$608 million (2011 - nil) in the U.S. cost centre. For the nine months ended September 30, 2012, the Company recognized a ceiling test impairment of \$1,822 million (2011 - \$776 million) in the Canadian cost centre and \$2,386 million (2011 - nil) in the U.S. cost centre. The impairments resulted primarily from the decline in the 12-month average trailing natural gas prices which have reduced proved reserves volumes and values.

The 12-month average trailing prices used in the ceiling test calculations were based on the benchmark prices below. The benchmark prices were adjusted for basis differentials to determine local reference prices, transportation costs and tariffs, heat content and quality.

<sup>(1)</sup> Light Sweet.

In 2008, Encana signed a contract for the design and construction of the Production Field Centre ("PFC") for the Deep Panuke project. As at September 30, 2012, Canadian Division property, plant and equipment and total assets include Encana's accrual to date of \$612 million (\$607 million at December 31, 2011) related to this offshore facility as an asset under construction.

In 2007, Encana announced that it had entered into a 25-year lease agreement with a third-party developer for The Bow office project. As at September 30, 2012, Corporate and Other property, plant and equipment and total assets include Encana's accumulated costs to date of \$1,661 million (\$1,309 million at December 31, 2011). Beginning in July 2012, Encana assumed partial occupancy of The Bow office premises, initiated payments to the third party developer and commenced depreciation of The Bow asset. The Bow asset will be depreciated over the 25-year term of the agreement. At the conclusion of the 25-year term, the remaining asset is expected to be derecognized (See Note 10).

(All amounts in \$ millions unless otherwise specified)

### 8. Property, Plant and Equipment, Net (continued)

Liabilities for the PFC and The Bow office project are included in other liabilities and provisions in the Condensed Consolidated Balance Sheet and are disclosed in Note 10. There is no effect on the Company's current net earnings or cash flows related to the capitalization of the PFC.

Long-term debt is accounted for at amortized cost using the effective interest method of amortization. As at September 30, 2012, long-term debt had a carrying value of \$7,684 million and a fair value of \$8,878 million (as at December 31, 2011 - \$8,150 million carrying value and a fair value of \$9,215 million). The estimated fair value of long-term borrowings is categorized within level 2 of the fair value hierarchy, as described in Note 14, and has been determined based on market information or by discounting future payments of interest and principal at estimated interest rates expected to be available to the Company at period end.

(All amounts in \$ millions unless otherwise specified)

# 10. Other Liabilities and Provisions (continued)

#### The Bow Office Project

As described in Note 8, Encana has recognized the accumulated construction costs for The Bow office project as an asset with a related liability. Beginning in July 2012, Encana assumed partial occupancy of The Bow office premises and commenced payments to the third-party developer. Over the 25-year term of the agreement, Encana will depreciate The Bow asset and reduce the accrued liability. At the conclusion of the 25-year term, the remaining asset and corresponding liability are expected to be derecognized. The total undiscounted future payments related to The Bow office commitment are outlined below. In conjunction with the Split Transaction as described in Note 12, Encana has subleased part of The Bow office space to Cenovus Energy Inc. ("Cenovus"). Expected sublease recoveries from Cenovus are outlined below.

(undiscounted)	2012	2013	2014	2015	2016	Thereafter	Total

Sublease recoveries	\$ (8)	\$ (46)	\$ (47)	\$ (47)	\$ (47)	\$ (1,093)	\$ (1,288)

#### **Production Field Centre**

As described in Note 8, during the construction phase of the PFC, Encana has recognized an asset under construction with a corresponding liability. Upon commencement of operations, Encana will recognize the PFC as a capital lease. Encana's total discounted future payments related to the PFC total \$564 million. The total undiscounted future payments related to the PFC are outlined below.

#### Dividends

During the three months ended September 30, 2012, Encana paid dividends of \$0.20 per common share totaling \$147 million (2011 - \$0.20 per common share totaling \$147 million). During the nine months ended September 30, 2012, Encana paid dividends of \$0.60 per common share totaling \$441 million (2011 - \$0.60 per common share totaling \$441 million).

### **Encana Stock Option Plan**

Encana has stock-based compensation plans that allow employees to purchase common shares of the Company. Option exercise prices are not less than the market value of the common shares on the date the options are granted. Options granted are exercisable at 30 percent of the number granted after one year, an additional 30 percent of the number granted after two years, are fully exercisable after three years and expire five years after the date granted.

All options outstanding as at September 30, 2012 have associated Tandem Stock Appreciation Rights ("TSARs") attached. In lieu of exercising the option, the associated TSARs give the option holder the right to receive a cash payment equal to the excess of the market price of Encana's common shares at the time of the exercise over the original grant price. In addition, certain stock options granted are performance-based. The Performance TSARs vest and expire under the same terms and conditions as the underlying option. Vesting is also subject to Encana attaining prescribed performance relative to predetermined key measures. Historically, most holders of options with TSARs have elected to exercise their stock options as a Stock Appreciation Right ("SAR") in exchange for a cash payment. See Note 13 for further information on Encana's outstanding and exercisable TSARs and Performance TSARs.

(All amounts in \$ millions unless otherwise specified)

### 12. Share Capital (continued)

#### **Encana Restricted Share Units ("RSUs")**

Encana has a stock-based compensation plan whereby eligible employees are granted RSUs. An RSU is a conditional grant to receive an Encana common share, or the cash equivalent, as determined by Encana, and in accordance with the terms of the RSU Plan and Grant Agreement. The value of one RSU is notionally equivalent to one Encana common share. RSUs vest three years from the date granted, provided the employee remains actively employed with Encana on the vesting date. The Company intends to settle vested RSUs in cash on the vesting date. See Note 13 for further information on Encana's outstanding RSUs.

#### **Encana Share Units Held by Cenovus Employees**

On November 30, 2009, Encana completed a corporate reorganization to split into two independent publicly traded energy companies - Encana Corporation and Cenovus Energy Inc. (the "Split Transaction"). In conjunction with the Split Transaction, each holder of Encana share units disposed of their right in exchange for the grant of new Encana share units and Cenovus share units. Share units include TSARs, Performance TSARs, SARs, and Performance SARs. The terms and conditions of the share units are similar to the terms and conditions of the original share units.

With respect to the Encana share units held by Cenovus employees and the Cenovus share units held by Encana employees, both Encana and Cenovus have agreed to reimburse each other for share units exercised for cash by their respective employees. Accordingly, for Encana share units held by Cenovus employees, Encana has recorded a payable to Cenovus employees and a receivable due from Cenovus. The payable to Cenovus employees and the receivable due from Cenovus is based on the fair value of the Encana share units determined using the Black-Scholes-Merton model (See Notes 13 and 14). There is no impact on Encana's net earnings for the share units held by Cenovus employees. TSARs and Performance TSARs held by Cenovus employees will expire by December 2014. No further Encana share units will be granted to Cenovus employees.

Cenovus employees may exercise Encana TSARs and Encana Performance TSARs in exchange for Encana common shares. The following table summarizes the Encana TSARs and Performance TSARs held by Cenovus employees as at September 30, 2012:

Canadian Dollar Denominated (C\$)	Number (millions)	Average Exercise Price
Encana TSARs held by Cenovus employees		
Outstanding	3.2	33.09
Exercisable	3.2	33.10
Encana Performance TSARs held by Cenovus employees		
Outstanding	4.6	32.37
Exercisable	4.6	32.37

#### 13. Compensation Plans

Encana has a number of compensation arrangements that form the Company's long-term incentive plan awarded to eligible employees. They include TSARs, Performance TSARs, SARs, Performance SARs, Performance Share Units ("PSUs"), Deferred Share Units ("DSUs"), RSUs and a Restricted Cash Plan. The majority of these compensation arrangements are share-based.

Encana accounts for TSARs, Performance TSARs, SARs, Performance SARs and RSUs held by Encana employees as cash-settled share-based payment transactions and accordingly, accrues compensation costs over the vesting period based on the fair value of the rights determined using the Black-Scholes-Merton model. TSARs, Performance TSARs, SARs and Performance SARs granted are exercisable at 30 percent of the number granted after one year, an additional 30 percent of the number granted after two years, are fully exercisable after three years and expire five years after the date granted. RSUs vest three years from the date of grant, provided the employee remains actively employed with Encana on the vesting date.

Waightad

(All amounts in \$ millions unless otherwise specified)

#### **13. Compensation Plans** (continued)

As at September 30, 2012, the fair value of the Encana share units held by Encana employees was estimated using the following weighted average assumptions: risk free rate of 1.11 percent, dividend yield of 3.72 percent, volatility of 36.27 percent, expected term of 1.7 years and an Encana market share price of C\$21.53. As at September 30, 2012, the fair value of the Cenovus share units held by Encana employees was estimated using the following weighted average assumptions: risk free rate of 1.11 percent, dividend yield of 2.56 percent, volatility of 33.65 percent, expected term of 0.6 years and a Cenovus market share price of C\$34.31. For both Encana and Cenovus share units held by Encana employees, volatility was estimated using historical volatility rates.

The amounts recognized for share-based payment transactions are as follows:

	Three Months Ended			Nine Months Ended						
	September 30,					September 30,				
		2012		2011		2012		2011		
Compensation Costs of Cash-Settled Transactions	\$	33	\$	(78)	\$	78	\$	8		
Compensation Costs of Equity-Settled Transactions		(3)		3		2		9		
Total Compensation Costs		30		(75)		80		17		
Less: Total Compensation Costs Capitalized		(8)		16		(23)		(10)		
Total Compensation Expense	\$	22	\$	(59)	\$	57	\$	7		

Of the total compensation expense recorded for the three months ended September 30, 2012, \$15 million (2011 - \$26 million recovery) was included in operating costs and \$7 million (2011 - \$33 million recovery) was included in administrative expenses.

Of the total compensation expense recorded for the nine months ended September 30, 2012, \$28 million (2011 - \$4 million) was included in operating costs and \$29 million (2011 - \$3 million) was included in administrative expenses.

#### A) Tandem Stock Appreciation Rights

All options to purchase common shares issued under the Encana Stock Option Plan have associated TSARs attached. In lieu of exercising the option, the associated TSARs give the option holder the right to receive a cash payment equal to the excess of the market price of Encana's common shares at the time of exercise over the exercise price. The TSARs vest and expire under the same terms and conditions as the underlying option.

The following table summarizes information related to the Encana and Cenovus TSARs held by Encana employees as at September 30, 2012:

	Encana TS	SARs	Cenovus <sup>-</sup>	ΓSARs	
		Weighted Average		Weighted Average	
		Exercise		Exercise	
Canadian Dollar Denominated (C\$)	Outstanding	Price	Outstanding	Price

Exercisable, End of Period	6,773,630	32.62	2,135,355	29.84	

For the nine months ended September 30, 2012, Encana recorded compensation costs of \$18 million related to the Encana TSARs and compensation costs of \$2 million related to the Cenovus TSARs (2011 - a reduction in compensation costs of \$3 million related to the Encana TSARs and compensation costs of \$4 million related to the Cenovus TSARs).

(All amounts in \$ millions unless otherwise specified)

## **13. Compensation Plans** (continued)

#### B) Performance Tandem Stock Appreciation Rights

From 2007 to 2009, Encana granted Performance TSARs. In lieu of exercising the option, the option holder has the right to receive a cash payment equal to the excess of the market price of Encana's common shares at the time of exercise over the exercise price. The Performance TSARs vest and expire under the same terms and conditions as the underlying option. Vesting is also subject to Encana attaining prescribed performance relative to an internal recycle ratio and predetermined key measures. Performance TSARs that do not vest when eligible are forfeited.

The following table summarizes information related to the Encana and Cenovus Performance TSARs held by Encana employees as at September 30, 2012:

	Encana Perfo		Cenovus Performance TSARs		
		Weighted Average Exercise		Weighted Average Exercise	
Canadian Dollar Denominated (C\$)	Outstanding	Price	Outstanding	Price	
Outstanding, Beginning of Year	7,879,130	31.50	5,751,358	28.60	
Exercised - SARs	-	-	(2,098,894)	28.26	
Exercised - Options	-	-	(11,656)	26.63	
Forfeited	(707,669)	31.41	(306,178)	26.58	
Expired	(2,221,132)	29.45	(31,789)	26.64	
Outstanding, End of Period	4,950,329	32.44	3,302,841	29.02	
Exercisable, End of Period	4,950,265	32.44	3,302,841	29.02	

For the nine months ended September 30, 2012, Encana recorded compensation costs of \$1 million related to the Encana Performance TSARs and compensation costs of \$2 million related to the Cenovus Performance TSARs (2011 - a reduction in compensation costs of \$10 million related to the Encana Performance TSARs and compensation costs of \$12 million related to the Cenovus Performance TSARs).

#### C) Stock Appreciation Rights

During 2008 and 2009, Canadian dollar denominated SARs were granted to employees, which entitle the employee to receive a cash payment equal to the excess of the market price of Encana's common shares at the time of exercise over the exercise price of the right.

The following table summarizes information related to the Encana and Cenovus SARs held by Encana employees as at September 30, 2012:

	Encana S	ARs	Cenovus SARs		
		Weighted Average Exercise		Weighted Average Exercise	
Canadian Dollar Denominated (C\$)	Outstanding	Price	Outstanding	Price	
Outstanding, Beginning of Year Exercised	1,972,651	33.81	1,640,575 (505,951)	30.73 29.69	
Forfeited	(77,898)	33.88	(18,686)	34.11	
Outstanding, End of Period	1,894,753	33.81	1,115,938	31.15	
Exercisable, End of Period	1,886,454	33.82	1,112,890	31.15	

(All amounts in \$ millions unless otherwise specified)

## 13. Compensation Plans (continued)

#### C) Stock Appreciation Rights (continued)

Since 2010, U.S. dollar denominated SARs have been granted to eligible employees. The terms and conditions are similar to the Canadian dollar denominated SARs. The following table summarizes information related to U.S. dollar denominated Encana SARs held by Encana employees as at September 30, 2012:

	Encana S	SARs
		Weighted Average Exercise
U.S. Dollar Denominated (US\$)	Outstanding	Price
Outstanding, Beginning of Year	12,645,469	26.78
Granted	481,732	20.54
Exercised	(4,400)	20.91

Outstanding, End of Period	12,454,526	26.50
Exercisable, End of Period	3,278,362	30.73

For the nine months ended September 30, 2012, Encana recorded compensation costs of \$20 million related to the Encana SARs and compensation costs of \$1 million related to the Cenovus SARs (2011 - reduction in compensation costs of \$5 million related to the Encana SARs and compensation costs of \$2 million related to the Cenovus SARs).

#### D) Performance Stock Appreciation Rights

During 2008 and 2009, Encana granted Performance SARs to certain employees which entitle the employee to receive a cash payment equal to the excess of the market price of Encana's common shares at the time of exercise over the grant price. Performance SARs are subject to Encana attaining prescribed performance relative to an internal recycle ratio and predetermined key measures. Performance SARs that do not vest when eligible are forfeited.

The following table summarizes information related to the Encana and Cenovus Performance SARs held by Encana employees as at September 30, 2012:

	Encana Performance SARs		Cenovus Peri SARs		
Canadian Dollar Denominated (C\$)	Outstanding	Weighted Average Exercise Price	Outstanding	Weighted Average Exercise Price	
Outstanding, Beginning of Year	2,710,057	32.07	2,282,061	28.88

Exercisable, End of Period	2,509,193	32.20	1,403,015	28.81	

For the nine months ended September 30, 2012, Encana recorded compensation costs of \$1 million related to the Encana Performance SARs and compensation costs of \$2 million related to the Cenovus Performance SARs (2011 - reduction in compensation costs of \$3 million related to the Encana Performance SARs and compensation costs of \$5 million related to the Cenovus Performance SARs).

(All amounts in \$ millions unless otherwise specified)

#### **13. Compensation Plans** (continued)

#### E) Performance Share Units

Since 2010, PSUs have been granted to eligible employees which entitle the employee to receive, upon vesting, a cash payment equal to the value of one common share of Encana for each PSU held, depending upon the terms of the PSU plan. PSUs vest three years from the date of grant, provided the employee remains actively employed with Encana on the vesting date.

The ultimate value of the PSUs will depend upon Encana's performance measured over the three-year period. Each year, Encana's performance will be assessed by the Board of Directors (the "Board") to determine whether the performance criteria have been met. Based on this assessment, up to a maximum of two times the original PSU grant may be awarded in respect of the year being measured. The respective proportion of the original PSU grant deemed eligible to vest for each year will be valued and the notional cash value deposited to a PSU account, with payout deferred to the final vesting date.

The following table summarizes information related to the PSUs as at September 30, 2012:

	Canadian Dollar	U.S. Dollar
	Denominated	Denominated
	Outstanding	Outstanding
	PSUs	PSUs
Outstanding, Beginning of Year	1,238,391	1,088,667
Granted	212,602	26,803
Deemed Eligible to Vest	(427,003)	(393,036)
Units, in Lieu of Dividends	27,660	20,485
Forfeited	(93,923)	(44,369)
Outstanding, End of Period	957,727	698,550

For the nine months ended September 30, 2012, Encana recorded compensation costs of \$9 million related to the outstanding PSUs (2011 - compensation costs of \$11 million).

#### F) Deferred Share Units

The Company has in place a program whereby Directors and certain key employees are issued DSUs, which vest immediately, are equivalent in value to a common share of the Company and are settled in cash. DSUs can be redeemed in accordance with the terms of the agreement and expire on December 15th of the year following the Director's resignation or employee's departure.

Employees have the option to convert either 25 or 50 percent of their annual High Performance Results ("HPR") award into DSUs. The number of DSUs is based on the value of the award divided by the closing value of Encana's share price at the end of the performance period of the HPR award.

The following table summarizes information related to the DSUs as at September 30, 2012:

Canadian Dollar Denominated	DSUs
Outstanding, Beginning of Year	904,853
Granted	106,354
Converted from HPR awards	38,077
Units, in Lieu of Dividends	29,317
Redeemed	(60,434)
Outstanding, End of Period	1,018,167

For the nine months ended September 30, 2012, Encana recorded compensation costs of \$5 million related to the outstanding DSUs (2011 - reduction in compensation costs of \$5 million).

Outetanding

(All amounts in \$ millions unless otherwise specified)

#### 13. Compensation Plans (continued)

#### G) Restricted Share Units

Since 2011, RSUs have been granted to eligible employees. An RSU is a conditional grant to receive an Encana common share, or the cash equivalent, as determined by Encana, and in accordance with the terms of the RSU Plan and Grant Agreement. The value of one RSU is notionally equivalent to one Encana common share. RSUs vest three years from the date granted, provided the employee remains actively employed with Encana on the vesting date. As at September 30, 2012, Encana plans to settle the RSUs in cash on the vesting date.

The following table summarizes information related to the RSUs as at September 30, 2012:

	Canadian Dollar Denominated Outstanding RSUs	U.S. Dollar Denominated Outstanding RSUs
Outstanding, Beginning of Year	1,751,167	1,573,571
Granted	297,828	83,343
Units, in Lieu of Dividends	56,771	46,936
Forfeited	(138,354)	(89,938)
Outstanding, End of Period	1,967,412	1,613,912

For the nine months ended September 30, 2012, Encana recorded compensation costs of \$19 million related to the outstanding RSUs (2011 - compensation costs of \$9 million). The paid in surplus balance as at September 30, 2012 and December 31, 2011 relates to the RSUs.

#### H) Restricted Cash Plan

In October 2011, Encana's Board approved the use of a Restricted Cash Plan as a component of the long-term incentive grant to eligible employees. The Restricted Cash Plan is a time-based conditional grant to receive cash which, in accordance with the corresponding grant agreement, requires that the employee remain actively employed with Encana on the vesting date. The Restricted Cash Plan vests over three years with one third payable after each anniversary of the grant date. For the nine months ended September 30, 2012, Encana recorded compensation costs of \$16 million (2011 - compensations costs of nil) relating to the Restricted Cash Plan grant.

## I) Pensions and Other Post-Employment Benefits

The periodic pension and other post-employment benefits ("OPEB") expense for the nine months ended September 30 is as follows:

	Pension Benefits				OPEB			
	-	2012		2011		2012		2011
Current service costs	\$	4	\$	9	\$	11	\$	9
Interest cost		10		12		3		3
Expected return on plan assets		(12)		(12)		-		-
Amortization of net actuarial gains and losses		11		-		-		-
Total Defined Benefit Plan Expense	\$	13	\$	9	\$	14	\$	12

	Pension Benefits				OPEB			
	 2012		2011		2012		2011	
Defined Benefit Plan Expense	\$ 13	\$	9	\$	14	\$	12	
Defined Contribution Plan Expense	33		26		-		-	
Total Benefit Plans Expense	\$ 46	\$	35	\$	14	\$	12	

Encana's net benefit plan expense for the three months ended September 30, 2012 was \$20 million (2011 - \$15 million) and for the nine months ended September 30, 2012 was \$60 million (2011 - \$47 million). Encana's contribution to the defined benefit pension plans for the nine months ended September 30, 2012 was \$24 million (2011 - \$18 million). Encana's contribution to the defined contribution pension plans for the nine months ended September 30, 2012 was \$33 million (2011 - \$29 million).

(All amounts in \$ millions unless otherwise specified)

### 14. Fair Value Measurements

#### A) Fair Value

Fair value is defined as the price that would be received to sell an asset or the price paid to transfer a liability in an orderly transaction between market participants at the measurement date. Valuation techniques include the market, income, and cost approach. Market approach uses information generated by market transactions involving identical or comparable assets or liabilities; income approach converts estimated future amounts to a present value; and cost approach is based on the amount that currently would be required to replace an asset.

#### B) Fair Value Hierarchy

Inputs used in determining fair value are characterized according to a hierarchy that prioritizes those inputs based on the degree to which they are observable. The three input levels of the fair value hierarchy are as follows:

- Level 1 Inputs represent quoted prices in active markets for identical assets or liabilities, such as exchange-traded commodity derivatives.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either
  directly or indirectly, such as quoted market prices for similar assets or liabilities in active markets or other market
  corroborated inputs.
- Level 3 Inputs that are not observable from objective sources, such as forward prices supported by little or no market activity or internally developed estimates of future cash flows used in a present value model.

In determining fair value, the Company utilizes the most observable inputs available. If a fair value measurement reflects inputs at multiple levels within the hierarchy, the fair value measurement is characterized based on the lowest level of input that is significant to the fair value measurement.

The fair values of cash and cash equivalents, accounts receivable and accrued revenues, and accounts payable and accrued liabilities approximate their carrying amount due to the short-term maturity of those instruments except for the amounts associated with share units issued as part of the Split Transaction, as disclosed below. The fair value of cash in reserve approximates its carrying amount due to the nature of the instrument held.

Recurring fair-value measurements are performed for risk management assets and liabilities and for share units resulting from the Split Transaction, which are discussed further in Notes 15 and 12, respectively. These items are carried at fair value in the Condensed Consolidated Balance Sheet and are classified within the three levels of the fair value hierarchy in the tables below. There have been no transfers between the hierarchy levels during the period.

(All amounts in \$ millions unless otherwise specified)

14. Fair Value Measurements (continue	d)								
As at September 30, 2012		Level 1 Quoted Prices in Active Markets	Leve Oth Observal Inpo	ner ole	Ur	Level 3 Significant nobservable Inputs	Total Fair Value	Netting (5)	Carrying Amount

As at December 31, 2011									
Risk Management									
Risk Management Assets (1)	\$	1	\$ 2,12	24	\$	18	\$ 2,143	\$ (96)	\$ 2,047
Risk Management Liabilities (1)		-	10	3		-	103	(96)	7
Share units resulting from the Split Transaction									
Encana Share Units Held by Cenovus Employees									
Accounts receivable and accrued revenues (2)	\$	-	\$	-	\$	1	\$ 1	\$ -	\$ 1
Accounts payable and accrued liabilities (3)		-		-		1	1	-	1
Cenovus Share Units Held by Encana Employees									
Accounts payable and accrued liabilities (4)		-		-		83	83	-	83

<sup>(1)</sup> Including current portion.

The Company's Level 1 and Level 2 risk management assets and liabilities consist of commodity fixed price contracts and basis swaps with terms to 2015. The fair values of these contracts are based on a market approach and are estimated using inputs which are either directly or indirectly observable at the reporting date, such as exchange and other published prices, broker quotes and observable trading activity.

#### C) Level 3 Fair Value Measurements

The Company's Level 3 risk management assets and liabilities consist of natural gas options and power purchase contracts and with terms to 2013 and 2017, respectively. The fair values of both the natural gas options and the power purchase contracts are based on an income approach and are modeled internally using observable and unobservable inputs such as natural gas price volatilities and forward power prices in less active markets. The unobservable inputs are obtained from third parties whenever possible and reviewed by the Company for reasonableness.

Amounts related to risk management assets and liabilities are recognized in revenues and operating costs according to their purpose. Amounts related to share units resulting from the Split Transaction are recognized in operating costs, administrative expenses and capitalized within property, plant and equipment as described in Note 13.

<sup>(2)</sup> Receivable from Cenovus

<sup>(3)</sup> Payable to Cenovus employees.

<sup>(4)</sup> Payable to Cenovus.

<sup>(5)</sup> Netting to offset derivative assets and liabilities with the same counterparty, which are presented within the fair value hierarchy on a gross basis, even where the legal right of offset exists.

(All amounts in \$ millions unless otherwise specified)

#### 14. Fair Value Measurements (continued)

#### C) Level 3 Fair Value Measurements (continued)

A summary of changes in Level 3 fair value measurements for the nine months ended September 30 is presented below:

			Share Units Resulting from Split				
	 Risk Man	agement	Transaction				
	2012	2011	2012	2011			
Balance, Beginning of Year	\$ 18	\$ (7)	\$ (83)	\$ (120)			
Total gains (losses)	(33)	17	(7)	(24)			
Purchases, issuances and settlements:							
Purchases	-	-	-	-			
Settlements	(11)	2	41	65			
Transfers in and out of Level 3	-	-	-	-			
Balance, End of Period	\$ (26)	\$ 12	\$ (49)	\$ (79)			
Change in unrealized gains (losses) related to							
assets and liabilities held at end of period	\$ (37)	\$ 17	\$ (18)	\$ 2			

Quantitative information about unobservable inputs used in Level 3 fair value measurements is presented below:

	Valuation Technique	Unobservable Input	As at September 30, 2012	As at December 31, 2011
Risk Management - Natural Gas Options	Option Model	Price volatility	30% - 39%	-
Risk Management - Power	Discounted Cash Flow	Forward prices (\$/Megawatt Hour)	\$46.00 - \$55.00	\$71.50 - \$77.55
Share units resulting from the Split Transaction	Option Model	Cenovus share unit volatility	33.65%	32.48%

A five percentage point increase or decrease in natural gas price volatility would cause a corresponding \$2 million (nil at December 31, 2011) decrease or increase to net risk management assets. A 10 percent increase or decrease in estimated forward power prices would cause a corresponding \$6 million (\$6 million at December 31, 2011) increase or decrease to net risk management assets. A five percentage point increase or decrease in Cenovus share unit estimated volatility would cause a corresponding \$3 million (\$6 million at December 31, 2011) increase or decrease to accounts payable and accrued liabilities.

## 15. Financial Instruments and Risk Management

#### A) Financial Instruments

Encana's financial assets and liabilities are recognized in cash and cash equivalents, accounts receivable and accrued revenues, cash in reserve, accounts payable and accrued liabilities, risk management assets and liabilities and long-term debt.

#### B) Risk Management Assets and Liabilities

Risk management assets and liabilities arise from the use of derivative financial instruments and are measured at fair value. See Note 14 for a discussion of fair value measurements.

Unrealized Risk Management Position	As at September 30, 2012	December 31,
Risk Management		
Current asset	\$ 633	\$ 1,806
Long-term asset	77	241
	710	2,047
Risk Management		
Current liability	11	1
Long-term liability	9	6
	20	7
Net Risk Management Asset	\$ 690	\$ 2,040

(All amounts in \$ millions unless otherwise specified)

Fair Value of Contracts, End of Period	\$ 690	\$	(1,351)	\$ 298

#### C) Risks Associated with Financial Assets and Liabilities

The Company is exposed to financial risks arising from its financial assets and liabilities. Financial risks include market risks (such as commodity prices, foreign exchange and interest rates), credit risk and liquidity risk. The fair value or future cash flows of financial assets or liabilities may fluctuate due to movement in market prices and the exposure to credit and liquidity risks.

#### **Commodity Price Risk**

Commodity price risk arises from the effect that fluctuations of future commodity prices may have on the fair value or future cash flows of financial assets and liabilities. To partially mitigate exposure to commodity price risk, the Company has entered into various derivative financial instruments. The use of these derivative instruments is governed under formal policies and is subject to limits established by the Board. The Company's policy is to not use derivative financial instruments for speculative purposes.

Natural Gas - To partially mitigate the natural gas commodity price risk, the Company uses NYMEX swaps and options. To help protect against widening natural gas price differentials in various production areas, Encana has entered into basis swaps to manage the price differentials between these production areas and various sales points.

Crude Oil - To help protect against widening crude oil price differentials between North American and world prices, Encana has entered into basis swaps.

Power - The Company has entered into Canadian dollar denominated derivative contracts to manage its electricity consumption costs.

The table below summarizes the sensitivity of the fair value of the Company's risk management positions to fluctuations in commodity prices, with all other variables held constant. The Company has used a 10 percent variability to assess the potential impact of commodity price changes. Fluctuations in commodity prices could have resulted in unrealized gains (losses) impacting pre-tax net earnings as at September 30 as follows:

	201	2	201	11	
	10% Price	10% Price	10% Price		10% Price
	Increase	Decrease	Increase		Decrease
Natural gas price	\$ (151)	149	\$ (459)	\$	459
Crude oil price	17	(17)	-		-
Power price	6	(6)	5		(5)

#### Credit Risk

Credit risk arises from the potential that the Company may incur a loss if a counterparty to a financial instrument fails to meet its obligation in accordance with agreed terms. This credit risk exposure is mitigated through the use of Board-approved credit policies governing the Company's credit portfolio including credit practices that limit transactions according to counterparties' credit quality. Mitigation strategies may include master netting arrangements, requesting collateral and/or transacting credit derivatives. The Company executes commodity derivative financial instruments under master agreements that have netting provisions that provide for offsetting payables against receivables. As at September 30, 2012, the Company had no significant collateral balances posted and there were no credit derivatives in place.

As at September 30, 2012, cash equivalents include high-grade, short-term securities, placed primarily with financial institutions and companies with strong investment grade ratings. Any foreign currency agreements entered into are with major financial institutions in Canada and the U.S. or with counterparties having investment grade credit ratings.

(All amounts in \$ millions unless otherwise specified)

### 15. Financial Instruments and Risk Management (continued)

#### C) Risks Associated with Financial Assets and Liabilities (continued)

#### Credit Risk (continued)

A substantial portion of the Company's accounts receivable are with customers in the oil and gas industry and are subject to normal industry credit risks. As at September 30, 2012, approximately 90 percent (95 percent at December 31, 2011) of Encana's accounts receivable and financial derivative credit exposures are with investment grade counterparties.

As at September 30, 2012, Encana has four counterparties (2011 - four counterparties) whose net settlement position individually account for more than 10 percent of the fair value of the outstanding in-the-money net risk management contracts by counterparty. As at September 30, 2012, these counterparties accounted for 29 percent, 14 percent, 12 percent and 11 percent of the fair value of the outstanding in-the-money net risk management contracts.

#### Liquidity Risk

Liquidity risk arises from the potential that the Company will encounter difficulties in meeting a demand to fund its financial liabilities as they come due. The Company manages liquidity risk using cash and debt management programs.

The Company has access to cash equivalents and a wide range of funding alternatives at competitive rates through commercial paper, committed revolving bank credit facilities and debt capital markets. As at September 30, 2012, Encana had available unused committed revolving bank credit facilities totaling \$5.1 billion which include C\$4.0 billion (\$4.1 billion) on a revolving bank credit facility for Encana and \$999 million on a revolving bank credit facility for a U.S. subsidiary. The facilities remain committed through October 2015.

Encana also had unused capacity under two shelf prospectuses for up to \$6.0 billion, or the equivalent in foreign currencies, the availability of which is dependent on market conditions, to issue up to C\$2.0 billion (\$2.0 billion) of debt securities in Canada and up to \$4.0 billion in the U.S. These shelf prospectuses expire in June 2013 and June 2014, respectively. The Company believes it has sufficient funding through the use of these facilities to meet foreseeable borrowing requirements.

The Company minimizes its liquidity risk by managing its capital structure. The Company's capital structure consists of shareholders' equity plus long-term debt, including the current portion. The Company's objectives when managing its capital structure are to maintain financial flexibility to preserve Encana's access to capital markets and its ability to meet financial obligations and finance internally generated growth, as well as potential acquisitions. To manage the capital structure, the Company may adjust capital spending, adjust dividends paid to shareholders, purchase shares for cancellation pursuant to normal course issuer bids, issue new shares, issue new debt or repay existing debt.

The timing of cash outflows relating to financial liabilities are outlined in the table below:

	Le	ess Than 1 Year	1	- 3 Years	4 -	- 5 Years	6 - 9 Years	Thereafter	Total
Accounts Payable and Accrued Liabilities	\$	1,936	\$	-	\$	-	\$ -	\$ -	\$ 1,936
Risk Management Liabilities		11		6		2	1	-	20
Long-Term Debt (1)		464		2,334		764	3,129	7,527	14,218

<sup>(1)</sup> Principal and interest.

#### Foreign Exchange Risk

Foreign exchange risk arises from changes in foreign exchange rates that may affect the fair value or future cash flows of the Company's financial assets or liabilities. As Encana operates primarily in North America, fluctuations in the exchange rate between the U.S. and Canadian dollars can have a significant effect on the Company's reported results. Encana's functional currency is Canadian dollars; however, the Company reports its results in U.S. dollars as most of its revenue is closely tied to the U.S. dollar and to facilitate a more direct comparison to other North American oil and gas companies. As the effects of foreign exchange fluctuations are embedded in the Company's results, the total effect of foreign exchange fluctuations is not separately identifiable.

(All amounts in \$ millions unless otherwise specified)

#### 15. Financial Instruments and Risk Management (continued)

### C) Risks Associated with Financial Assets and Liabilities (continued)

#### Foreign Exchange Risk (continued)

To mitigate the exposure to the fluctuating U.S./Canadian dollar exchange rate, Encana maintains a mix of both U.S. dollar and Canadian dollar debt and may also enter into foreign exchange derivatives. At September 30, 2012, Encana had \$5.9 billion in U.S. dollar debt issued from Canada that was subject to foreign exchange exposure (\$5.9 billion at December 31, 2011) and \$1.8 billion in debt that was not subject to foreign exchange exposure (\$2.2 billion at December 31, 2011). There were no foreign exchange derivatives outstanding as at September 30, 2012.

Encana's foreign exchange (gain) loss primarily includes unrealized foreign exchange gains and losses on the translation of U.S. dollar denominated debt issued from Canada, unrealized foreign exchange gains and losses on the translation of U.S. dollar denominated risk management assets and liabilities held in Canada and foreign exchange gains and losses on U.S. dollar denominated cash and short-term investments held in Canada. A \$0.01 change in the U.S. to Canadian dollar exchange rate would have resulted in a \$51 million change in foreign exchange (gain) loss at September 30, 2012 (2011 - \$48 million).

#### Interest Rate Risk

Interest rate risk arises from changes in market interest rates that may affect the fair value or future cash flows from the Company's financial assets or liabilities. The Company may partially mitigate its exposure to interest rate changes by holding a mix of both fixed and floating rate debt and may also enter into interest rate derivatives to partially mitigate effects of fluctuations in market interest rates. There were no interest rate derivatives outstanding as at September 30, 2012.

At September 30, 2012, the Company had no floating rate debt. Accordingly, the sensitivity in net earnings for each one percent change in interest rates on floating rate debt was nil (2011 - \$8 million).

#### 16. Commitments and Contingencies

#### Commitments

The following table outlines the Company's commitments as at September 30, 2012:

						Expec	ted F	Future Pay	/men	ts				
(undiscounted)		2012		2013		2014		2015		2016	T	Thereafter		Total
Transportation and Processing	\$	237	\$	896	\$	959	\$	973	\$	867	\$	6,041	\$	9,973
Drilling and Field Services	*	223	*	207	*	124	•	87	*	55	•	73	•	769
Operating Leases		15		51		48		44		38		103		299
Capital Commitments		79		4		-		-		-		-		83
Total	\$	554	\$	1,158	\$	1,131	\$	1,104	\$	960	\$	6,217	\$	11,124

#### Contingencies

The Company is involved in various legal claims and actions arising in the ordinary course of operations. Although the outcome of these claims cannot be predicted with certainty, the Company does not expect these matters to have a material adverse effect on Encana's financial position, cash flows or results of operations. If an unfavorable outcome were to occur, there exists the possibility of a material adverse impact on the Company's consolidated net earnings or loss in the period in which the outcome is determined. Accruals for litigation and claims are recognized if the Company determines that the loss is probable and the amount can be reasonably estimated. The Company believes it has made adequate provision for such legal claims.

Non-operating foreign exchange gain (loss)	158	162	(90)	86	(99)	82	(181)	(325)	44	100
Income tax adjustments (4)	245	(48)	652	(359)	-	(82)	82	122	(31)	(9)
Operating Earnings (2, 4)	701	263	198	240	1,191	232	959	389	352	218

<sup>(1)</sup> Cash Flow is a non-GAAP measure defined as Cash from Operating Activities excluding net change in other assets and liabilities, net change in non-cash working capital and cash tax on sale of assets.

<sup>(3)</sup> Net earnings, operating earnings and cash flow per common share are calculated using the weighted average number of Encana common shares outstanding as follows:

		2	012		2011					
	Year-to-						Q3 Year-			
(millions)	date	Q3	Q2	Q1	Year	Q4	to-date	Q3	Q2	Q1
Weighted Average Common Shares Outstanding										
Basic	736.3	736.3	736.3	736.3	736.3	736.3	736.3	736.3	736.3	736.3
Diluted	736.3	736.3	736.3	736.3	737.2	736.8	737.4	737.6	737.6	737.6

<sup>(4)</sup> In conjunction with adopting U.S. GAAP, the Company has updated its quarterly Operating Earnings definition to calculate income taxes based on the discrete quarter results and exclude income taxes related to divestitures. The 2011 quarterly comparatives have been restated.

<sup>(2)</sup> Operating Earnings is a non-GAAP measure defined as Net earnings excluding non-recurring or non-cash items that Management believes reduces the comparability of the Company's financial performance between periods. Under U.S. GAAP, these after-tax items may include, but are not limited to, unrealized hedging gains/losses, impairments, foreign exchange gains/losses, income taxes related to divestitures and adjustments to normalize the effect of income taxes calculated using the estimated annual effective tax rate.

# Supplemental Financial & Operating Information (unaudited)

Financial Metrics	2012	2011
	Year-to-	
	date	Year
Debt to Debt Adjusted Cash Flow (1, 2, 3)	1.9x	1.8x
Debt to Adjusted EBITDA (1, 2, 3)	2.0x	1.9x
Debt to Adjusted Capitalization (1, 3)	37%	33%

<sup>(1)</sup> Calculated using long-term debt, including current portion.
(2) Calculated on a trailing 12-month basis.
(3) A non-GAAP measure which is defined and calculated in the non-GAAP measures section of Encana's Management Discussion and Analysis.

<sup>(1)</sup> The Canadian Division per-unit results for transportation and processing expenses and operating expenses have been updated to present processing costs with transportation expense. Formerly these processing costs were presented in operating expenses. Encana has updated its presentation as a result of the Canadian Division entering into firm gathering and processing agreements with the divestiture of its two natural gas processing plants during the first quarter of 2012. Encana believes the nature of processing costs more closely align with transportation expense.
